SIMON FRASER UNIVERSITY

Senate Graduate Studies Committee

1991 REPORT TO SENATE

The Dean of Graduate Studies is responsible for the general supervision of graduate work at the University and chairs the Senate Graduate Studies Committee. This report outlines the position of graduate studies at Simon Fraser University, describes some changes made in 1991 and makes recommendations for future directions.

The enclosed copy of the 1992 S.F.U. Graduate Studies Fact Book describes, in quantitative terms, the graduate student body in Fall 1991 and provides some retrospective data on completion rates. It is the second edition. It is designed to complement information in the Simon Fraser University Fact Book, produced by the Office of Analytical Studies.

I. Enrolments and Degrees

Table I shows the recent history of graduate enrolments and degrees granted. The FTE enrolment figures should be treated with caution on two grounds. Prior to the Fall 1989, they were determined through a reporting process which was subject to considerable variation between departments. Starting in the Fall 1989, a new, rigorous definition of Part-time status was adopted; this was primarily responsible for the large change in the (Head Count)/FTE ratio between 1988/89 and 1989/90. The official recognition of Part-time status and the introduction of a reduced semester tuition fee for Part-time students were major advances in improving the accessibility of our graduate programs. Program approved for part-time study are listed in Appendix A.

As requested by Senate in January, 1989, I can report that the introduction of a formal requirement of competence in the English language has proceeded very smoothly. A very small fraction of applicants recommended for admission whose first language is not English did not produce TOEFL scores of at least 570. Of these, a large majority submitted satisfactory other evidence of their English language competence. Most TOEFL scores are over 600.

II. Degree Completion/Withdrawal

Degree completion times are presented, starting on page 22, in the Graduate Studies Fact Book. It should be noted that these data do not take into account the possibility that a student may have been enrolled part-time for all or part of the program and thus overstate completion times, especially for programs with large numbers of part-time students.

I remain concerned by what appear in many cases to be excessive times for degree completion. When resources are limited, it is especially important that they be used effectively and efficiently. The Ministry of Postsecondary Education has recently become interested in degree completion time and may be considering measures that would effectively penalize universities with lengthy completion times.

I am actively encouraging departments to ensure both that their degree requirements are realistic and that their students make satisfactory progress, as required by Senate regulations, toward meeting those requirements. The Graduate Studies Handbook, first

published last summer, contains guidelines for supervisors and students that (if followed) should improve prospects for expeditious degree completion. I am also considering more rigorous enforcement of the regulations requiring annual progress reports.

I am also pressing for timely appointment of supervisory committees. In establishing the Graduate Studies Database, I encountered many students who had been here for several years, yet apparently had no supervisory committees. This situation has largely been remedied; each semester, reminders about 'delinquent' students are sent to departments by my office; a minor flood of committee recommendations follows.

Withdrawal rates are presented, starting on page 27, in the Graduate Studies Fact Book. There are tremendous variations in rates between programs. The overall rates for the University as a whole are in line with the results of similar studies performed in the U.S. I know of no directly comparable studies yet completed in Canada, although the Western Canadian Deans of Graduate Studies are now proceeding with a project to compile these data, as well as degree completion time data.

I am very concerned about the low completion rates in some of our graduate programs. Withdrawal may be due to any one of or a combination of factors including: lack of ability, lack of motivation, lack of financial resources, health problems, and deficiencies in the graduate programs and/or their implementation. I am assisting a graduate student who is, as her Master's project, performing a study of a sample of students who withdrew; I hope to have the results within a year. Other analyses of the dataset used to generate the reports in the Graduate Studies Fact Book are on-going. I also plan to initiate an exit questionnaire.

Meanwhile, I am continuing to press for improved funding for graduate financial aid. There have been very substantial increases to the graduate scholarships budget in the last two years. I am very pleased that the current agreement with Teaching Support Staff Union increases the Teaching Assistant stipend and reduces the workload. The latter factor will both allow students more time for their studies and will create additional teaching assistant positions, allowing more graduate students to receive appointments.

III. Grades

Page 9 of the Graduate Studies Fact Book gives information on the S.F.U. graduate grades of the end of the Summer 1991 semester; it excludes students who had not yet taken an S.F.U. graduate course. Data were taken from the Registrar's data files and incorporated into and processed within the Graduate Studies Database system.

The tremendous range in the grade distributions among departments may stem from two causes: (1) differences in grading practices and (2) differences in the abilities of students. I believe that, most likely, it is a mixture of these with the former a larger contributor than the latter. This range is one of the reasons that I have moved away from interdepartmental comparisons of CGPA in the ranking of applicants for S.F.U. graduate scholarships.

IV. Special Arrangements

The Senate Graduate Studies Committee serves as the Graduate Program Committee of students enrolled under Special Arrangements. I have given special attention to these students. With the goal of ensuring their satisfactory progress, I have brought all their supervisory committees into compliance with Senate's regulations and require up-to-date

progress reports as a condition of registration. The response of students and supervisors has been excellent.

I am pleased to report that the defences of theses completed under Special Arrangements, which I chair, have all been quite successful. Table II provides data on degree completion.

Historically, Special Arrangements have been a high risk area; students either succeed or fail spectacularly. The number of students enrolled have remained roughly constant around 25. Degree completion has been highly variable: 6 in 1991, 2 in 1990, 3 in 1989, 4 in 1988, 7 in 1987, 6 in 1986, 2 in 1985, 6 in 1984, 1 in 1983, 2 in 1982, and 4 in 1981. Some other students have dropped out and others encountered health problems. By the steps outlined above and by continued rigorous adherence to the criteria for entrance into Special Arrangements, I hope to improve the success rate.

V. S.G.S.C. Motions

A summary, prepared by the Office of the Registrar, of the motions passed by the S.G.S.C. is presented in Appendix B.

VI. The Future

I remain optimistic about the future of graduate studies at SFU. We have introduced a number of new programs which are in the process of implementation. Several other exciting new program initiatives are presently in the planning process; some of these have received approval from the Senate Committee on Academic Planning approval to proceed with detailed planning. Substantial growth in graduate programs is a component of the University's strategic plan. It will be essential to ensure that sufficient resources are allocated to support this growth while maintaining high quality.

The quality of our existing programs remains high and the quality of most of the thesis defences which I have attended has been high. With rare exception, applicants recommended by departments for entry into Ph.D. programs have been very strong. Through aggressive recruiting of excellent applicants with the aid of entrance scholarships, rigorous enforcement of the present requirements for satisfactory progress, improved financial aid and careful monitoring of student supervision, it should be possible to improve further the quality of our graduate programs, and to decrease degree completion times and withdrawal rates, thus making more effective use of our resources.

B.P. Clayman

Dean of Graduate Studies

APPENDIX A

Report to Senate of the Graduate Programs approved for Part-time Study by the Senate Graduate Studies Committee from January 1991 to December 1991.

Biological Sciences Liberal Studies Special Arrangements Women's Studies Master of Pest Management, Master of Aquaculture Master of Arts in Liberal Studies Master's, Ph.D. Master of Arts

APPENDIX B

Report to Senate of the Activities of the Senate Graduate Studies Committee from January 1991 to December 1991.

Number of Meetings - 5

- 1. Recommendations for Admission under Special Arrangements. Four Recommendations were considered. Three were approved and one denied.
- 2. The 'parenthetical' degree designations were removed from MA(EDUC), MSC(EDUC), MA(CMNS), MSC(KINES) and MA(CRIM).
- 3. Graduate Curriculum Changes in the Departments of Communications, Education, Criminology, Economics, English, Business Administration, Computing Science, Engineering, MRM and Biological Sciences.
- 4. New Graduate courses in Education, Business, Engineering, Economics, History and Criminology.
- 6. Additional Graduate Programs approved for part-time study:

Biological Sciences (MPM, MAQ) Liberal Studies (MALS) Special Arrangements (Master's, Ph.D.) Women's Studies (MA)

- 7. A sub-committee of the Senate Graduate Studies Committee was established to consider a graduate student appeal. The appeal was denied.
- 8. Guidelines for the Selection of Examiners were established and distributed to members of the Committee.
- 9. Approved the following changes in the General Regulations-Graduate Studies:

General Regulation 1.7.2

FROM: 1.7.2 Course Requirements for the Master's Degree

Master's candidates must complete the University minimum requirements of 30 semester hours work in one of the following ways:

- a) take a minimum of 12 semester hours of course work and submit an original thesis
- b) take a minimum of 20 semester hours of course work and submit at least two extended essays, or a project

Depending on the requirements of the program, a student may or may not have a choice between these two alternatives. A Graduate Program Committee may require work in addition to the minimum requirements, either on an individual basis or, with Senate ratification for all students in the program.

TO: 1.7.2 Course requirements for the Master's Degree

Master's candidates must complete the University minimum requirement of 30 semester hours work in one of the following ways:

- a) take a minimum of 12 semester hours of graduate course work and submit an original thesis
- b) take a minimum of 20 semester hours of graduate course work and submit at least two extended essays, or a project
- c) take a minimum of 30 semester hours of graduate course work and pass a final written and oral field examination

Depending on the requirements of the program, a student may or may not have a choice between these three alternatives. A Graduate Program Committee may require work in addition to the minimum requirements, either on an individual basis or, with Senate ratification for all students in the program.

General Regulation 1.2

FROM:

Supervisory Committee

The student's Supervisory Committee is composed of two or more faculty members who help the student define a program of studies and report on the student's progress to the Graduate Program Committee. The Supervisory Committee forms part of the student's final examining committee.

TO:

Supervisory Committee

The student's Supervisory Committee is composed of two or more persons who help the student define a program of studies and report on the student's progress to the Graduate Program Committee. The Supervisory Committee forms part of the student's final examining committee.

General Regulation 1.6.4

FROM:

Supervisory Committee

In consultation with the graduate student, the Senior Supervisor shall recommend a Supervisory Committee composed of the Senior Supervisor and at least one other faculty member. This recommendation shall be made during the same semester in which the Senior Supervisor is appointed. The composition of the Supervisory Committee, for which the Senior Supervisor is Chair, shall be approved by the Graduate Program Committee and sent to the Dean of Graduate Studies for final approval. It shall be sent to the Faculty Graduate Studies Committee for information.

TO:

Supervisory Committee

In consultation with the student, the Senior Supervisor shall recommend the composition of the Supervisory Committee. The Committee consists of the Senior Supervisor and, in most cases, at least one other faculty member. For degrees designated by Senate as professional degrees (M.B.A., M.ED., M.Eng., M.P.M., M.Pub., M.R.M) the other member(s) of the Committee may be other suitably qualified person(s). This recommendation shall be made during the same semester in which the Senior Supervisor is appointed. The composition of the Supervisory Committee, for which the Senior Supervisor is Chair, shall be approved by the Graduate Program Committee and sent to the Dean of Graduate Studies for final approval. It shall be sent to the Faculty Graduate Studies Committee for information.

10. The Dean of Graduate Studies was asked to negotiate an agreement for joint supervision arrangements among the Western Canadian Universities.

Simon Fraser University

Graduate Studies Fact Book

The Graduate Studies Fact Book provides a snap-shot of the Fall Semester student population, as well as retrospective data on program completion. The information is derived from enrolment data provided by the Office of the Registrar, supplemented by information gathered and processed in this office. It is largely complementary to the S.F.U. Fact Book prepared by the Office of Analytical Studies. Minor differences in enrolment figures exist between the two publications due to differences in the data collection interval.

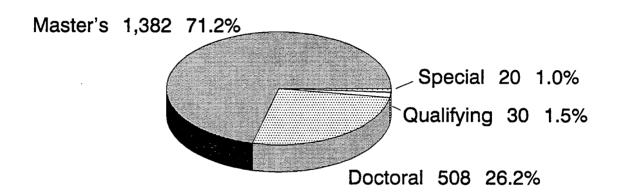

Each section is headed by a graphical summary. In some cases, the summaries omit programs where the numbers reported are too small to be significant; the tabular data are complete.

It is hoped that this Fact Book will be a useful source of information for the campus community. This office can provide additional more specialized reports, if these are required.

SIMON FRASER UNIVERSITY

MEMORANDUM

TO: Senate Committee on

Enrollment Management

and Planning

FROM: W. Wattamaniuk, Director

Analytical Studies

RE: Undergraduate Admissions

Targets for 1992/93

DATE:

January 29, 1992

We anticipate that the Ministry of Advanced Education, Training and Technology will provide funding for an increase of 500 full-time equivalent (FTE) undergraduates at Simon Fraser University for the fiscal year (FY) 1992/93 (year four of the Provincial Access Program).

With this information, and as a result of meetings with the Director of Admissions and the Registrar, I am proposing enrollment and admission targets for 1992-2, 1992-3 and 1993-1 as follows.

FTE ENROLLMENT TARGETS FOR 1992/93

My latest estimate indicates that we will exceed the funded enrollment target for FY1991/92 by 320 FTE under-graduates. As in prior years, we expect that the Ministry will allow us to carry over the unfunded FTE's into 1992/93.

Assuming that the Ministry funds 500 Access FTE, it follows that our undergraduate enrollment base will have to increase by at least 180 FTE in 1992/93. This represents a year over year increase of 1.5%.

ADMISSION TARGETS FOR 1991/92

Allowing for FTE's expected to be generated by undergraduates continuing from previous semesters, my estimate of new students required to achieve the funded enrollment targets for 1992/93 are as follows:

Fiscal Year 1992/93	<u>Intake of New</u> <u>Students</u>
Summer semester, 1992	900
Fall semester, 1992	3,400
Spring semester, 1993	900
Total intake	5,200

Table 1 provides a comparison with previous semesters.

It should be noted that SFU's total intake of new students was 4,590 in 1991/92. The increase to 5,200 in 1992/93 is required to, first, offset the bulge of students who entered in 1987/88 through 1989/90 and who will be graduating in 1992 and, second, to match the FTE increase required to meet the funding target.

ADMISSION TARGETS BY BASIS OF ADMISSION FOR 1992/93

Within the global targets identified above there are, broadly speaking, three groups of students for which separate targets must be identified at this time. These are B.C. GRXII, B.C. College Transfer, and "Other." "Other" includes University Transfer, Degree holders, Mature, Out-of-Province GRXII or College Transfer, Visiting, Special Entry, Concurrent Studies, B.C. GRXI, B.C. Technical School, etc.

I am proposing that the admission targets for each group be established as shown below for each of the semesters in 1992/93. The corresponding minimum Grade Point Averages required for admission have been estimated and are also shown. Forecasts of student demand for admission by semester and admission group are consistent with the GPA cutoffs required.

	Ad	mission Targ	<u>rets</u>	Minimum Grade
	<u>1992-2</u>	<u>1992-3</u>	<u>1993-1</u>	<u>Point Average</u> (<u>Estimated</u>)
B.C. GRXII	60	1,500	75	2.75
B.C. College	310	1,000	400	2.40
"Other"	530	900	425	as required
Total Intake	900	3,400	900	

ADMISSION TARGETS BY FACULTY FOR 1992/93

Fall, 1992 will be the first semester whereby students will be admitted directly into the Faculty of Science. Minimum requirements for direct entry students have been specified by Senate. Minimum requirements for College Transfer students are proposed in a separate paper elsewhere.

The number of new students proposed for the Faculty of Science is included within the global target and is shown below.

	Admissio	n Targets	<u>Minimum Grade</u> <u>Point Average</u>
	<u>1992-3</u>	<u>1993-1</u>	(Estimated)
B.C. GRXII	375	n.a.	2.50
B.C. College	<i>7</i> 5	n.a.	2.00
"Other"	50	n.a.	as required
Total Intake	500	90	

Table 2 provides a comparison with previous semesters.
