417-3 ENTOMOLOGY

Functional morphology and adaptations of insects in relation to their behaviour, development, and ecology. The laboratory will include a research project. (2-0-3)
Prerequisite: Biol 317-3

THIS IS IN ADDITION TO TWO PAGES ALREADY SUBMITTED

417-3 ENTOMOLOGY

Analysis of the biological characteristics which enable insects to be successful organisms in nature as well as highly successful pests. Particular emphasis on characteristics which render insects vulnerable to various types of pest management. Laboratory includes recognition of insect pests and project work on selected types of problems encountered by professional entomologists. (2-0-3)
prerequisite: Recommended Biol 317-3

Since this was established it has evolved to a point considerably divergent from the present calendar description.
