

## SPRING SEMESTER 2006 COURSE OUTLINE

## EDUC 422-4 (EDUCATION)

### LEARNING DISABILITIES

C100

Teachers and healthcare professionals in the field of learning disabilities in Canada are faced with the challenge of integrating ideas from academic disciplines that have their origins in diverse schools of thought. What consensus is there in the field regarding the characteristics of children with learning disabilities? What are the neurobiological, social, and cultural origins of learning disabilities? What can teachers and healthcare professionals do to better understand children with learning disabilities? Education 422 is a theory based course that reviews the conceptual and research dimensions of learning disabilities from a North American and international perspective. It forms a framework for the more practical dimensions of teaching children with learning disabilities presented in Education 424: Learning Disabilities laboratory (for which Educ 422 is a prerequisite or corequisite).

**PREREQUISITE:** EDUC 315 or PSYC 250

**TEXT(S):**

Smith, C. R. *Learning Disabilities (5th ed.)* Pearson Education. (2004)

<b>REQUIREMENTS:</b> Online participation(responses to readings & assign.)	30%
