COURSE DESCRIPTION

The mathematics curriculum in British Columbia has undergone major change in the last few years. The revised curriculum includes new topics such as data analysis and probability, and other topics, such as geometry, receive greater emphasis. Calculators have become a natural component of the school program. Students are expected to use manipulative materials as a major vehicle for learning.

This course is designed for prospective and practicing *elementary* school teachers who wish to explore the fundamentals of the learning/teaching process as it applies to mathematics. The course will draw on the latest research in mathematics learning, and will show how such findings may be used in the classroom. Students will be expected to become familiar with and confident in the use of a variety of manipulative materials such as geo-boards, logic blocks, and coloured rods. They will also explore the realities of mathematical learning by examining their own learning powers and patterns. On completion of the course it is hoped that participants will feel more at ease with the subject of mathematics, be able to deal confidently with the prescribed curriculum, and be able to plan mathematical instruction within a consistent framework.

OUTLINE OF TOPICS

- Theories of mathematics learning
- Measurement
- Rational numbers
- Estimation
- Data analysis
- Algebra
- Problem solving
- Arithmetic operations
- Geometry
- Ratio and proportion
- Technology
- Evaluation and remediation

REQUIREMENTS

Students will be expected to attend all classes, and to participate fully in classwork and discussions. Assignments given in previous years included the following:

- an assignment that requires students to examine a number of professional journals related to the teaching of mathematics.
- a lesson development assignment related to the B.C. Mathematics Curriculum Guide.
- 2 midterm 1- hour exams.
- Presentation to the class.
- Individual projects related to personal interests in mathematics education.

REQUIRED TEXT (2 copies will be available on 24 hours reserve)

Van de Walle, John A. Elementary School Mathematics: Teaching Developmentally. New York: Longman.
