MEMORANDUM			
ATTENTION	Senate	DATE	April 4, 2014
FROM RE:	Gordon Myers, Chair Senate Committee on Undergraduate Studies Faculty of Science (SCUS 14-14)	PAGES	1/3
			Tord Mars

For information:

Acting under delegated authority at its meeting of April 3, 2014 SCUS approved the following curriculum revisions effective Spring 2015.

1. Department of Math (SCUS 14-14a)

(i) Upper Division requirement changes to the Mathematics Major and Honours Programs(ii) Description and Prerequisite change to MACM 203, 204

2. Department of Biomedical Physiology and Kinesiology (SCUS 14-14b)

(i) Title and description change to BPK 304W

(ii) Prerequisite and/or description change to BPK 496, 497, 498

(iii) New Course Proposal: BPK 458-3, Prevention and Management of Cardiovascular Disease

(iv) Program Continuance changes to the Behavioral Neuroscience Major and Honours Programs

- (v) Addition of BISC 202 to the Lower Division requirements in the Major and Honors Biomedical Physiology Program
- 3. Department of Biological Sciences (SCUS 14-14c)

(i) New Course Proposal: BISC 113 -3, Biology in Everyday Life (with Breadth-Science designation)(ii) Prerequisite change to BISC 100, 101, 102

4. Department of Chemistry (SCUS 14-14d)

(i) Change to CHEM 482 to allow students to repeat for credit.

The following business was passed by the Faculty of Science Undergraduate Studies Curriculum Committee;

Mathematics (MATH)

- Motion: Calendar Description Updates
 - Mathematics, Major and Honors Programs
 - Upper Division requirement changes
 - details (delete Math 308, add Math 447, 408, and 443)
- Motion: Course Change
 - Math 157 (updated description for each course)
 - MACM 203, 204 (description and prerequisite changes)
- Biomedical Physiology and Kinesiology (BPK)
- Motion: Course Description Updates
 - BPK 304W (name and description change)
 - BPK 496, 497, 498 (pre- and co-requisite updates)
- Motion: New Course Proposal
 - BPK 458 (new course)
 - to be offered as a distance education course through CODE
 - to be cross-listed with HSCI 458
- Motion: Changes to Program Continuance Requirements, Behavioral Neuroscience Programs
 - Major and Honors Programs
 - increase minimum GPA to 2.2

BioScience (BISC)

- Motion: New Course Proposal
 - BISC 113DE
 - to be offered as a distance education course
 - designated as a breadth course
- Motion: Prerequisite Changes, BISC 100, 101, 102

- so has BISC 113 been approved as a breadth course? – or is this simply BISC 100 without the laboratory which had been approved for breadth designation?

- ask Jo for language - for BPK, should 458 not then list HSCI 458 as being not eligible for credit?

- update the BPK motions

MATHEMATICS

Motion: To change the upper division requirements for the mathematics Majors and Honors programs

Rationale: The department would like all mathematics majors and honors students to take at least one upper division course in discrete mathematics. MATH 308 is deleted as an option because it is not a discrete mathematics course. MATH 447, 408, 443 are added to provide greater choice.

1A) From (current description- mathematics major program):

Upper Division Requirements

Students complete a minimum total of 44 units, including the following.

Students complete 15 units, including MATH 340 - Algebra II: Rings and Fields (3)

and one of MATH 308 - Linear Optimization (3) MATH 343 - Applied Discrete Mathematics (3) MATH 345 - Introduction to Graph Theory (3)

and one of MATH 320 - Introduction to Analysis II (3) MATH 322 - Complex Variables (3)

and one of MATH 338 - Advanced Linear Algebra (3) MATH 341 - Algebra III: Groups (3) MATH 342 - Elementary Number Theory (3)

and one of MATH 310 - Introduction to Ordinary Differential Equations (3) MACM 316 - Numerical Analysis I (3)

To (new description- mathematics major program):

Upper Division Requirements

Students complete a minimum total of 44 units, including the following.

Students complete 15 units, including

MATH 340 - Algebra II: Rings and Fields (3)

and one of MATH 308 - Linear Optimization (3) MATH 343 - Applied Discrete Mathematics (3) MATH 345 - Introduction to Graph Theory (3) <u>MATH 447 - Coding Theory (3)</u> <u>MATH 408 - Discrete Optimization (3)</u> <u>MATH 443 - Combinatorial Theory (3)</u>

and one of MATH 320 - Introduction to Analysis II (3) MATH 322 - Complex Variables (3)

and one of MATH 338 - Advanced Linear Algebra (3) MATH 341 - Algebra III: Groups (3) MATH 342 - Elementary Number Theory (3)

and one of

MATH 310 - Introduction to Ordinary Differential Equations (3) MACM 316 - Numerical Analysis I (3)

1B) From (old description- mathematics honours programs):

Upper Division Requirements

Students complete a total of 60 upper division units. 48 units will satisfy requirements for the mathematics honours program. 36 units must include upper division MATH and MACM coursework, including:

MATH 340 - Algebra II: Rings and Fields (3) MATH 341 - Algebra III: Groups (3)

and one of

MATH 308 - Linear Optimization (3) MATH 343 - Applied Discrete Mathematics (3) MATH 345 - Introduction to Graph Theory (3)

and one of

MATH 320 - Introduction to Analysis II (3) MATH 322 - Complex Variables (3)

and one of

MATH 338 - Advanced Linear Algebra (3) MATH 342 - Elementary Number Theory (3)

and one of

MATH 310 - Introduction to Ordinary Differential Equations (3) MACM 316 - Numerical Analysis I (3)

To (new description- mathematics honours programs):

Upper Division Requirements

Students complete a total of 60 upper division units. 48 units will satisfy requirements for the mathematics honours program. 36 units must include upper division MATH and MACM coursework, including:

MATH 340 - Algebra II: Rings and Fields (3) MATH 341 - Algebra III: Groups (3)

and one of

MATH 308 - Linear Optimization (3) MATH 343 - Applied Discrete Mathematics (3) MATH 345 - Introduction to Graph Theory (3) MATH 447 - Coding Theory (3) MATH 408 - Discrete Optimization (3) MATH 443 - Combinatorial Theory (3)

and one of

MATH 320 - Introduction to Analysis II (3) MATH 322 - Complex Variables (3)

and one of

MATH 338 - Advanced Linear Algebra (3) MATH 342 - Elementary Number Theory (3)

and one of

MATH 310 - Introduction to Ordinary Differential Equations (3) MACM 316 - Numerical Analysis I (3)

Development of computer mod applications of linear algebra. T calculations, experiments with models, data fitting and optimiz	els that analyze and illustrate Fopics include: large-scale matrix cellular automata, population zation, image analysis.	Using a mathematical software package for Development of computer models that ana algebra. All calculations and experiments v package. Topics include: large-scale matri automata, indexing, searching and ranking	or doing calculations in linear algebra. Ilyze and illustrate applications of linear will be done in the Matlab software x calculations, experiments with cellular pages on the internet, population models,				

PREREQUISITE

Does this course replicate the content of a previously approved course to such an extent that students should not receive credit for both courses? If so, this should be **noted in the prerequisite**.

PREREQUISITE

One of CMPT 125, 126 or 128 and one of MATH 150, 151, 154, or 157. Students in excess of 75 units may not take MACM 203 for further credit. MATH 232 or 240 (can be taken as corequisite).

LEARNING OUTCOMES

	One of CMPT 102, 120, 126, 128 or 130 and one of MATH 150, 151, 154, or 157 and
TO-	one of MATH 232 or 240. MATH 232 or 240 can be taken as corequisite. Students in
	excess of 80 units may not take MACM 203 for further credit. Quantitative

data fitting and optimization, image analysis, and cryptography.

RATIONALE

The change to the Description clarifies that the course is not primarily about "modeling" but rather about using software packages for "doing". The second change is to state which software package will be used. MACM 203 uses Matlab. The math department explicitly wishes to advertise this. The third change updates and expands the list of topics to what is being covered (in the first four offerings). The fourth change drops the requirement of CMPT 125 (a second programming course) so that mathematics students can take MACM 203 earlier in their program (preferably in their second year).

The fifth change from 75 to 80 units accommodates students transferring to SFU in their fifth semester who need to take MACM 203.

--	--	---------	--	--------	--	-----------	--	--------------------	--------------	------------

COURSE DESCRIPTION (FOR CALENDAR). 50-60 WORDS MAXIMUM. ATTACH A COURSE OUTLINE TO THIS PROPOSAL.

This course takes a multi-disciplinary approach to understanding the pathology, risk factors and treatments for the prevention and management of cardiovascular disease. Physical examination, as well as non-invasive cardiac imaging techniques will be discussed and demonstrated. Both theoretical and practical perspectives inform the course's approach to the principles of behavioural change (diet, physical exercise, and smoking cessation) and risk factor management. HSCI 458 is identical to BPK 458 and students cannot receive credit for both courses. Students with credit for HSCI 471 or BPK 421 (Fall 2013) may not complete this course for further credit.

0 How many times? 1 REPEAT FOR CREDIT NO YES

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by a library report and, if appropriate, confirmation that funding arrangements have been addressed.

No additional resources (listed as HSCI 458 and KK 458)

Library report status

RATIONALE FOR INTRODUCTION OF THIS COURSE

There is an increasing desire, and need, for training of students within the health sciences to understand aspects of cardiovascular disease development, prevention and management as cardiovascular disease is a leading cause of death and disability in Canada and the world. The prevalence of cardiovascular disease is so high that any person working in the fitness of health fields will encounter people with cardiovascular disease. This course will prepare students who are interested in working in these fields with high-level knowledge of this condition.

COREQUISITE

none

STUDENT LEARNING OUTCOMES

Upon satisfactory completion of the course students will be able to:

- To define the underlying pathophysiology of cardiovascular disease
- To assess the risk for future events in people with and without disease
- · To explain the principles of appropriate preventative management in patients at risk or with disease
- · To understand strategies for behavioural change.
- · To recognize the importance of co-morbidities with respect to cardiovascular disease prevention

PHYS 102 - Physics for the Life Sciences II (3)
PHYS 121 - Optics, Electricity and Magnetism (3)
PHYS 126 - Electricity, Magnetism and Light (3)
PHYS 141 - Studio Physics - Optics, Electricity and Magnetism (4)

TO:

Program Requirements Students complete a total of 132 units as specified below.

Minimum Grade

Honours students must achieve a minimum CGPA of 3.00 on all relevant measures (CGPA, upper division grade point average, department grade point average, department upper division grade point average).

(

Lower Division Requirements

A total of <u>57-59</u> lower division units in required, as follows.

Students complete all of

```
BISC 101 - General Biology (4)
BISC 102 - General Biology (4)
BISC 202 – Genetics (3)
CHEM 121 - General Chemistry and Laboratory I (4)
CHEM 122 - General Chemistry II (2)
CHEM 126 - General Chemistry Laboratory II (2)
CHEM 281 - Organic Chemistry I (4)
CHEM 282 - Organic Chemistry II (2)
BPK 142 - Introduction to Kinesiology (3)
BPK 201 - Biomechanics (3)
BPK 205 - Introduction to Human Physiology (3)
BPK 207 - Human Motor Systems (3)
STAT 201 - Statistics for the Life Sciences (3)
MBB 222 - Molecular Biology and Biochemistry (3)
MBB 231 - Cellular Biology and Biochemistry (3)
and one of

COURSE SUBJECT/NUMBER BISC 113

COURSE TITLE

LONG - for Calendar/schedule, no more than 100 characters including spaces and punctuation

Biology in Everyday Life

AND

SHORT - for enrollment/transcript, no more than 30 characters including spaces and punctuation

Biology in Everyday Life

CAMPUS where course will be taught:	\checkmark	Burnaby		Surrey		Vancouver		Great Northern Way	\checkmark	Off campus
--	--------------	---------	--	--------	--	-----------	--	--------------------	--------------	------------

COURSE DESCRIPTION (FOR CALENDAR). 50-60 WORDS MAXIMUM. ATTACH A COURSE OUTLINE TO THIS PROPOSAL.

This course emphasizes evolution and scientific inquiry as unifying themes. The diversity and the unity of all living organisms and the methods by which biologists answer questions about the living world are presented in this context. Topics covered include evolution, characteristics of living organisms, reproduction, metabolism, and ecology.

REPEAT FOR CREDIT () NO **()** YES How many times?

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by a library report and, if appropriate, confirmation that funding arrangements have been addressed.

status - completed, no new resources required

Library report status

RATIONALE FOR INTRODUCTION OF THIS COURSE

BISC 100DE has been offered as a distance education version of BISC 100 and designated as a lab course. Upon review, it has been determined that the course does not sufficiently fulfill the requirements for a lab course. This new course would provide students with content similar to BISC 100, the flexibility of a DE course but without the lab designation. This course would also fulfill the requirements for a "breadth-science course".

SCHEDULING AND ENROLLMENT INFORMATION

Indicate effective term and year course would first be offered and planned frequency of offering thereafter:

1154, twice a year: Summer and Fall terms

Will this be a required or elective course in the c	urriculum?	Required Elective	
What is the probable enrollment when offered?	Estimate:	70 students	FEBRUARY 2013

J. Sharp, T. McMullan

WQB DESIGNATION (attach approval from Curriculum Office)

none

PREREQUISITE

Does this course replicate the content of a previously-approved course to such an extent that students should not receive credit for both courses? If so, this should be noted in the prerequisite.

None. Students with credit for HSCI 100, BISC 101,102, or succeeding Biology courses, may not take BISC 113 for further credit. Students with a C or better in Biology 12, who are considering a BISC major, are encouraged to proceed directly to BISC 101 and 102. Breadth-Science.

COREQUISITE

none

STUDENT LEARNING OUTCOMES

Upon satisfactory completion of the course students will be able to:

Upon satisfactory completion of the course students will have an appreciation of the following concepts:

1. Natural selection plays an important role in fostering the biodiversity on Earth.

2. Adaptations connect form and function of organisms to their environment.

3. All organisms (including students) are connected. Our actions, behaviors, and biological processes are interdependent with other organisms.

4. The microscopic world formulates the network of structure and processes we see in the macroscopic world.

5. Biology is not static, but continually shaped by new discoveries arising from the scientific process.

FEES

Are there any proposed student fees associated with this course other than tuition fees? YES ()NO

CHEM 482 reclassification request

From : Daniel Leznoff <dleznoff@sfu.ca>

Mon, 24 Mar, 2014 23:53

Subject : CHEM 482 reclassification request

- To: Jo Hinchliffe < joah@sfu.ca>
- **Cc :** Mike Peragine <michele_peragine@sfu.ca>, Chemistry Academic Advisor <chemadv@sfu.ca>

Dear Jo,

As Chair of the Chemistry Undergraduate Studies Committee, I would like to request that CHEM 482 (Directed Study in Advanced Topics in Chemistry) be reclassified so that:

- 1. The course to be repeated for credit; and
- 2. Please allow for multiple enrollments of this course within the same term.

Each course offering is personalized between a student, a supervisor and a specific topic, and so there is no reason why a student could not take two CHEM 482 topics with two different supervisors (we would not approve it if it were the same supervisor); this could also be done in the same term, if desired. We have a case now that wishes to do this.

If you require any further information or a more formal memo, please let me know. Thanks very much, Danny Leznoff Professor and Chemistry Undergraduate Studies Committee Chair
