Description:

Education 424 is a laboratory extension of Education 422. Assessment procedures as well as methods and programs for learning disabilities are reviewed. Practical experience in the development and implementation of a remedial program is required.

The following major topics will be addressed:

1. data collection;
2. selection, administration and evaluation of assessment tools;
3. task analysis
4. instructional programming;
5. selection and evaluation of instructional materials;
6. classroom management of children with learning disabilities.

Specific arrangements regarding tutoring will be discussed at the first class meeting.
