**PREREQUISITE:**

60 credit hours

This course will explore the theoretical complexity of the notion of curriculum theory and development to reveal the sense of unreliability of such documents and practices that are not based on sound theory. A curriculum is as good as the people who write them. Without a sound theoretical base a curriculum cannot have practical validity as such. Good practice is grounded in good theory. Various philosophies of education and their possible implementation in curriculums will be examined in the context of these remarks.

**PURPOSE**

It is hoped that students will become fully aware of the complexity of curriculum theory and development so that they can design their own personal curriculums that reflect a solid basis in theory.

**EVALUATION**

Grading will be based on written assignments and class participation.
