RATIONALE (must be included)

Student demand for EVSC100 has led to its expansion from a course serving only EVSC majors and offered once per year, with annual enrolment of 70 (2006), to one offered at least twice each term, with annual enrolment of over 520 students (2016), most of whom are non-majors who take it as their science breadth elective. While course content and evaluation have remained the same, a guest lecturer model is no longer feasible and has not been used for several years. This description modification reflects that change.
