MEMORANDUM			
ATTENTION	Senate	DATE	October 8, 2019
FROM	Wade Parkhouse, Chair	PAGES	1/1
	Senate Committee on Undergraduate Studies	<u>^</u>	
RE:	New Course Proposals (SCUS 19-54)		Marca

For information:

Acting under delegated authority at its meeting of October 3, 2019 SCUS approved the following curriculum revisions effective Summer 2020.

a. Faculty of Science (SCUS 19-54)

1. Department of Physics

(i) New Course Proposal: PHYS 416-3, Introduction to Quantum Information Science

Senators wishing to consult a more detailed report of curriculum revisions may do so on the Senate Docushare repository at <u>https://docushare.sfu.ca/dsweb/View/Collection-12682</u>.

SCUS 19-54

SFU SENATE COMMITTEE ON NEW UNDERGRADUATE STUDIES	COURSE PROPOSAL 1 of 4 pages
COURSE SUBJECT PHYS NUMBER 416	
COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation Introduction to Quantum Information Science	
COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation Intro. Quantum Information	
CAMPUS where course will be normally taught: 🖌 Burnaby 🗌 Surrey 🗌 Vancouver 🗌 Great Northern W	Vay Off campus
COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description	ption box.
Includes topics such as qubits, density matrices, mixed states, entanglement, basic quantum a quantum cryptography, computational models and complexity, introductory quantum error complications.	algorithms, orrection, and
REPEAT FOR CREDIT YES VION Total completions allowed Within a term?	YES NO
LIBRARY RESOURCES NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more informatic please visit <u>www.lib.sfu.ca/about/overview/collections/course-assessments</u> .	or necessary library on,
RATIONALE FOR INTRODUCTION OF THIS COURSE	
Quantum Computation and Quantum Information are important and rapidly growing areas of Physics. Addition world leading group in this research area. Hence we intend to take advantage of this expertise to introduce a co in what is likely to be an important area of Physics in the 21st Century.	nally, SFU hosts a urse to train students

SFU	SENATE COMMITTEE ON
510	UNDERGRADUATE STUDIES

SCHEDULING AND ENROLLMENT INFORMATION

Effective term and year (e.g. FALL 2016) SUMMER 2020					
Term in which course will typically be offered \checkmark Spring \square Summer \square Fall					
Will this be a required or elective course in the curriculum? Required Elective					
What is the probable enrollment when offered? Estimate: 10					
UNITS Indicate number of units: 3					
Indicate no. of contact hours: 3 Lecture Seminar 1 Tutorial Lab Other; explain below					
OTHER					
This course will be cross-listed with PHYS 816.					

FACULTY

Which of your present CFL faculty have the expertise to offer this course?

Stephanic Simmons, Paul Haljan, Igor Herbut, Malcolm Kennett

WQB DESIGNATION

(attach approval from Curriculum Office)

Quantitative.	(Pending)	

PREREQUISITE AND / OR COREQUISITE

Prerequisite: PHYS 385 and either PHYS 384 or (MATH 314 and 419), or equivalent, with a minimum grade of C-.

SENATE COMMITTEE ON UNDERGRADUATE STUDIES

EQUIVALENT COURSES [For more information on equivalency, see Equivalency Statements under Information about Specific Course components.]

1. SEQUENTIAL COURSE [is not hard coded in the student information management system (SIMS).]

Students who have taken (place relevant course(s) in the blank below (ex: STAT 100)) first may not then take this course for further credit.

2. ONE-WAY EQUIVALENCY [is not hard coded in SIMS.]

(Place relevant course(s) in the blank below (ex: STAT 100)) will be accepted in lieu of this course.

3. TWO-WAY EQUIVALENCY [is hard coded and enforced by SIMS.]

Students with credit for (place relevant course(s) in the blank below (ex: STAT 100)) may not take this course for further credit.

YES Does the partner academic unit agree that this is a two-way equivalency? NO Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).

4. SPECIAL TOPICS PRECLUSION STATEMENT [is not hard coded in SIMS.]

FEES			 	
Are there any proposed student fees associated with this course other than tuition fees?	YES	V NO		

Are there any proposed student fees associated with this course other than tuition fees?

COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)

-Calculate properties of quantum states (purity, fidelity, Bloch sphere coordinates, entanglement) when expressed as density matrices

-Calculate the outcomes of small-scale quantum algorithms expressed in quantum circuit notation

-Produce appropriate measurement projectors corresponding to quantum observables

-Build small-scale quantum algorithms capable of generating a target quantum state

Determine which errors a quantum error-correcting algorithm will be robust against

-Construct basic quantum teleportation and error-correcting codes given certain operator constraints

-Design and implement algorithms able to perform quantum state tomography upon small-scale quantum systems

SENATE COMMITTEE ON UNDERGRADUATE STUDIES

RESOURCES

List any outstanding resource issues to be addressed prior to implementation: space, laboratory equipment, etc:

OTHER IMPLICATIONS

Criminal Record Check required

YES VO

OVERLAP CHECK

Final exam required

Checking for overlap is the responsiblity of the Associate Dean.

✓ YES

Each new course proposal must have confirmation of an overlap check completed prior to submission to the Faculty Curriculum Committee.

Name of Originator

Malcolm Kennett (physgchr@sfu.ca)
