**MEMORANDUM**

ATTENTION	Senate	DATE	November 5, 2021
FROM	Wade Parkhouse, Chair Senate Committee on Undergraduate Studies	PAGES	1/3
RE:	New Course Proposal		

**For information:**

Acting under delegated authority at its meeting of November 4, 2021 SCUS approved the following curriculum revision effective Summer 2022.

**a. Faculty of Applied Sciences (SCUS 21-78)****1. School of Computing Science****(i) New Course Proposals:**

- CMPT 210-3, Probability and Computing (REVISED SCUS 21-60)
- CMPT 362-3, Mobile Applications Programming and Design (REVISED SCUS 21-68)
- CMPT 410-3, Machine Learning
- CMPT 420-3, Deep Learning (Fall 2022)

**2. School of Engineering Science**

- (i) ENSC 453-4, Programming for Heterogeneous Computing Systems (Fall 2022)

**3. Faculty of Arts and Social Sciences (SCUS 21-79)****1. School of Criminology****(i) New Course Proposals:**

- CRIM 344-3, Sentencing: Theory, Law and Practice (Fall 2022)
- CRIM 405-3, Violence and Aggression (Fall 2022)

## 2. Department of Indigenous Studies

### (i) New Course Proposals:

- INDG 211-3, Researching Residential Schools: An Analysis of RS in North America (Fall 2022)
- INDG 250-3, Introduction to Indigenous Policy (Fall 2022)
- INDG 305-1, Treaties in Canada
- INDG 310-3, Indigenous Film

## 3. School of International Studies

### (i) New Course Proposal: IS 380-4, Civil Wars

## 4. Labour Studies Program

### (i) New Course Proposal: LBST 203-3, Work and Health (Fall 2022)

## 5. Department of Philosophy

### (i) New Course Proposal: PHIL 270-3, Data, Ethics and Society (Fall 2022)

## 6. Department of Psychology

### (i) New Course Proposal: PSYC 364-3, The Science of Happiness

## 7. School of Public Policy

### (i) New Course Proposals:

- PLCY 200-3, Introduction to Public Policy (Fall 2022)
- PLCY 300-4, Applied Public Policy Analysis (Spring 2023)
- PLCY 400-4, Public Policy Capstone Seminar (Fall 2023)

## 8. Urban Studies Program

### (i) New Course Proposals:

- URB 413-4, Storyscapes, Decolonizing the City Through Arts and Culture (Fall 2022)
- URB 423-4, Women in Cities, A Critical Intersectional Perspective (Fall 2022)
- URB 497-9, Comparative Urban Sustainability International Field Studies

## 9. Department of World Languages and Literatures

### (i) New Course Proposals:

- ITAL 360-4, Italian Literature as World Literature
- JAPN 360-4, Japanese Literature as World Literature (Fall 2022)

**c. Faculty of Science (SCUS 21-80)**

1. Department of Molecular Biology and Biochemistry

- (i) New Course Proposal: MBB 229-2, Introductory Molecular Biology and Biochemistry Laboratory  
(Spring 2023)

2. Department of Statistics and Actuarial Science

- (i) New Course Proposal: STAT 271-3, Probability and Statistics for Computing Science (Fall 2022)

Senators wishing to consult a more detailed report of curriculum revisions may do so on the Senate Docushare repository at <https://docushare.sfu.ca/dsweb/View/Collection-12682>.

**COURSE SUBJECT****NUMBER**
**COURSE TITLE LONG** — for Calendar/schedule, no more than 100 characters including spaces and punctuation

**COURSE TITLE SHORT** — for enrollment/transcript, no more than 30 characters including spaces and punctuation

COURSE SUBJECT NUMBER 

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation

CAMPUS where course will be normally taught:  Burnaby  Surrey  Vancouver  Great Northern Way  Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.

Machine Learning (ML) is the study of computer algorithms that improve automatically through experience. This course introduces students to the theory and practice of machine learning, and covers mathematical foundations, models such as (generalized) linear models, kernel methods and neural networks, loss functions for classification and regression, and optimization methods.

REPEAT FOR CREDIT  YES  NO Total completions allowed  Within a term?  YES  NO**LIBRARY RESOURCES**

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit [www.lib.sfu.ca/about/overview/collections/course-assessments](http://www.lib.sfu.ca/about/overview/collections/course-assessments).

**RATIONALE FOR INTRODUCTION OF THIS COURSE**

This course has been offered for a number of years as CMPT 419 (Special Topics in Artificial Intelligence), cross-listed with the graduate course CMPT 726 (Machine Learning). In the past, many different classes were offered as CMPT 419, making it difficult to determine what class the student took purely based on the course number. As a core AI class that is taken by many undergrads a year, Machine Learning should be offered with a unique undergrad course number.

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.
In machine learning, many recent successes have been achieved using neural networks with several layers, so-called deep neural networks. Convolutional neural nets, autoencoders, recurrent neural nets, long-short term memory networks, and generative adversarial networks will be presented. Students will look at techniques for training them from data, and applications.

REPEAT FOR CREDIT [ ] YES [X] NO Total completions allowed [ ] Within a term? [ ] YES [ ] NO

RATIONALE FOR INTRODUCTION OF THIS COURSE

This course started as one of the Special Topics courses. This was offered Summer 2020 and Summer 2021. The School of Engineering Science would now like to turn this into a regular academic course. This course covers emerging technology topics that are both very timely and increasingly relevant. This course will also serve as the Constrained Elective for the Computer Engineering Option.

*Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).*

**4. SPECIAL TOPICS PRECLUSION STATEMENT** [is not hard coded in SIMS.]

Students with credit for ENSC 462 under the title "Programming for Heterogeneous Computing Systems" may not take this course for further credit.

**FEEES**

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

**COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)**

With the significant slowdown of general-purpose CPU scaling, the computing industry has been actively exploring specialized and programmable hardware accelerators, such as GPUs and FPGAs. Major hardware and software companies have turned into heterogeneous computing solutions that include a mix of multicore CPUs, GPUs, and FPGAs. The goal of this course is to get our students prepared and competitive for this hot job market (heterogeneous computing). At the end of this course, students will master fundamental concepts and design principles of such heterogeneous computing systems. Students will also equip themselves with the highly demanded skills to program and optimize such systems, including the widely used OpenMP programming for multicore CPUs, CUDA programming for GPUs, and HLS programming for FPGAs.

**RESOURCES**

List any outstanding resource issues to be addressed prior to implementation: space, laboratory equipment, etc:

- CPU servers: Linux based desktops in ENSC lab area and/or remote access (available)
- GPUs: in ENSC and/or remote access (available)
- FPGAs: not available now. Currently based on simulation/synthesis. Propose to purchase around 8 Alveo U50 FPGA boards (about \$5K each) with department funding, or to build long-time relationship with AWS

**OTHER IMPLICATIONS**

Final exam required  YES  NO

Criminal Record Check required  YES  NO

#### FEES

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

#### COURSE – LEVEL EDUCATIONAL GOALS (OPTIONAL)

Discuss and critically analyze the role of sentencing in the criminal justice system.

Identify and critically analyze the complexities of Canadian sentencing law including the purpose and principles of sentencing.

Understand and critically analyze the methods used by judges at arriving at a sentence, including the use of sentencing ranges, starting points, ascertaining the facts relevant to a sentence, and the characterization of factors as aggravating or mitigating.

Identify and discuss the role of victims in the sentencing process, and the use of plea bargaining in the sentencing process.

Identify and critically analyze the various Criminal Code provisions pertaining to sentencing.

Discuss and critically analyze the approaches to sentencing used in other jurisdictions, such as sentencing grids, guideline statements, and computer-based approaches to sentencing.

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation Violence and Aggression

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation Violence and Aggression

CAMPUS where course will be normally taught: [checked] Burnaby [ ] Surrey [ ] Vancouver [ ] Great Northern Way [ ] Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box. A detailed examination of violence and aggression and efforts to control them from the earliest humans to the present. Topics include: the historical trajectory of violence, the changing nature of violent crime, legal definitions of it, and legal responses to it – some of which include violence.

REPEAT FOR CREDIT [ ] YES [checked] NO Total completions allowed [ ] Within a term? [ ] YES [ ] NO

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit www.lib.sfu.ca/about/overview/collections/course-assessments.

RATIONALE FOR INTRODUCTION OF THIS COURSE

This seminar will focus on the issues of violence, aggression, and violent crime. The strength of this course is that it discusses the historical trajectory of violence and aggression and highlights the changing nature of violence, legal definitions of it and legal responses to it. This overview of history of different types of violence differentiates this course from some other related courses that focus exclusively on sexual violence, homicide, or family violence. Students will be discussing various forms of violence, including superstitious killings, cruel and unusual punishments, despotism and political violence, major wars, interpersonal homicide, child abuse, violence against women, and violence against racial and sexual minorities. Students of criminology should find the course relevant to their studies because it also helps provide a context for the decline in violent crime that has occurred in many western democracies, including Canada, since the early 1990s. This course has been offered successfully three times now as a special topic and there is strong student interest in regularizing it. Will be first offered in 2024 as faculty member is going on study leave then has a course release, but want it in Calendar earlier so students can use it for planning purposes.

**EQUIVALENT COURSES** [For more information on equivalency, see Equivalency Statements under [Information about Specific Course components.](#)]

**1. SEQUENTIAL COURSE** [is not hard coded in the student information management system (SIMS).]

Students who have taken (*place relevant course(s) in the blank below (ex: STAT 100)*) **first** may not then take this course for further credit.

**2. ONE-WAY EQUIVALENCY** [is not hard coded in SIMS.]

(*Place relevant course(s) in the blank below (ex: STAT 100)*) will be accepted in lieu of this course.

**3. TWO-WAY EQUIVALENCY** [is hard coded and enforced by SIMS.]

Students with credit for (*place relevant course(s) in the blank below (ex: STAT 100)*) may not take this course for further credit.

Does the partner academic unit agree that this is a two-way equivalency?  YES  NO

*Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).*

**4. SPECIAL TOPICS PRECLUSION STATEMENT** [is not hard coded in SIMS.]

Students who have taken Special topics Violence and Aggression, Crim 313 in Spring 2016, Fall 2017 and Fall 2021 may not take this course for further credit.

#### FEES

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

#### COURSE – LEVEL EDUCATIONAL GOALS (OPTIONAL)

Upon completion of this course students should be able to:

- Examine the historical trajectory of violence until present using statistical sources from various disciplines and drawing on a broad range of theoretical approaches.
- Explore how and why the “civilizing process” and the Enlightenment led to a substantial decrease in violence.
- Examine the impact of the “rights revolution” on the rates of violence against the minorities.
- Critically analyze the current events, including those related to the changes in violent crime and domestic violence during COVID 19.

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.

Introduces students to the historical and contemporary contexts of treaty relations between settlers and the First Peoples of Turtle Island. Provides critical insight into the various treaties within Canada; treaty negotiations, including Indigenous oral histories; Indigenous resistance to treaty infringements; and other important legislation impacting treaty rights.

REPEAT FOR CREDIT  YES  NO Total completions allowed  Within a term?  YES  NO**LIBRARY RESOURCES**

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit [www.lib.sfu.ca/about/overview/collections/course-assessments](http://www.lib.sfu.ca/about/overview/collections/course-assessments).

**RATIONALE FOR INTRODUCTION OF THIS COURSE**

In response to the University's ARC initiative, this microcredit course is an opportunity for students as well as other interested learners and professionals to gain specialized knowledge about treaty-making and the ways in which it has shaped relations between settlers and Indigenous Peoples within the Canadian context.

This course introduces students to First Peoples' perspectives on treaty-making, treaty interpretations, and treaty rights. By focusing on the history of treaty relations between settlers and the First Peoples of Turtle Island, this course provides students with critical insight into contemporary relationships and political contexts in Canada. Students will learn about the pre-confederation treaties, the Numbered treaties, as well as the modern treaty process. Students will learn about the history of treaty negotiations; Indigenous oral histories of treaties; the relationship between land claims, colonial law, and treaty-making; Indigenous resistance to treaty infringement; and other important legislation impacting First Peoples treaty rights. This course will be a mixture of recorded lecture, assigned readings and videos, as well as evaluative activities, quizzes, and midterms.

While treaties are often mentioned and referred to in multiple Indigenous Studies courses, this microcredit course provides a comprehensive and detailed overview of this specific topic. Such expertise makes the introduction of this course vital for learners who are pursuing fields or interests that require this specialized knowledge, including but not limited to, public policy, law, geography, city planning, resource and environmental management, etc.

Income distribution and conditions of employment are a primary factory in social determinants of health. Even when jobs are available, deteriorating working conditions, wages and benefits, and increasing employment insecurity threaten health for many. Explores work and health in Canada in relation to income, gender, race, migration, and technological change and the legal and policy protections for health and safety in the workplace.

RATIONALE FOR INTRODUCTION OF THIS COURSE

This course has been taught by Dr. Jeanne Morgan as LBST 230 (Selected Topics). The course is now being regularized as part of the regular teaching rotation for Dr. Morgan, who has offered the course twice. It fills a gap among Labour Studies Program courses, as we do not currently have a dedicated course on work and health (from a social sciences perspective). Finally, it bolsters our lower division course offering and finalizes our compliment of lower division courses: two 100-level and three 200-level, once this course is added. Labour Studies currently has a disproportionate number of upper division courses.

RATIONALE FOR INTRODUCTION OF THIS COURSE

This is not so much a new course, as a new number for an existing course — viz. "SDA 270: Data, Ethics and Society". This is a course on a philosophical topic, taught by faculty from the philosophy department. We think it important that the course have a PHIL number, so that philosophy majors don't overlook it when choosing courses.

In creating this course (or rather, introducing a new number for an existing course) we are following the Linguistics Department, who offer their course "Computational Text Analysis" both as SDA 250 and LING 250.

Explores the colonialism embedded into the stories, landscapes, and systems of the North American city, and how Indigenous laws, stories, arts and culture hold keys to planning sustainable, equitable, decolonized cities. Grounded emphasis on Indigenous and non-Indigenous landscapes and planning institutions and practices in Vancouver.

REPEAT FOR CREDIT  YES  NO Total completions allowed  Within a term?  YES  NO**LIBRARY RESOURCES**

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. **RATIONALE FOR INTRODUCTION OF THIS COURSE**

This course has been offered twice, in summer 2020 and fall 2021, to record (for URB) student interest amongst undergraduate and graduate students. We took efforts to increase access including by collaborating with INDG to add a TA and cross-list. Students in the course came from multiple departments in FASS and FENV, Business, HSCI, SIAT, Education, and Communications. Student evaluations of the first offering were very positive.

Colonialism within the North American city has inscribed certain narratives and built forms onto Indigenous lands, while imposing genocidal legal and governance systems. Relying on harmful concepts like terra nullius and Doctrine of Discovery, urbanization has contributed to the erasure of pre-existing Indigenous laws, governance, knowledge systems, and languages. It is incumbent upon an Urban Studies Program, operating within layers of colonial institutions and in a context of layers of institutional commitments to reconciliation with persistent colonial legacies, to teach the embedded assumptions and inequities within systems of thinking about and enacting cities in North America, and to teach other ways of looking at and relating to the city from Indigenous traditions.

Adjunct Professor Kamala Todd, has designed and introduced this course as special topics since 2020 and is ideally positioned to continue teaching this course in a Visiting Professor capacity. Kamala has worked within local government as a planner, and within community as an artist, consultant, and facilitator advocating for transformation of the dominant narratives and ways of living in this place. From 2000-2006, she was the City of Vancouver's Aboriginal Social Planner. From 2018-2020, she was the City of Vancouver's first Indigenous Arts and Culture Planner. In all her work, she tries to honour Indigenous knowledge and protocols and help non-Indigenous people, especially planners and decision-makers, think about their responsibilities to the lands on which Vancouver sits. Her numerous films, reports, and planning initiatives are testament to these ongoing efforts. Assistant Professor Lyana Patrick has also indicated her willingness and competence to be listed as an instructor of this course.

This course could be cross-listed with URB 613 depending on future enrollment. The cross listed courses would cover the same material, but have different assignments and grading scales. In the event of cross listing, only undergraduates would be enrolled in URB 413 and only graduate students would be enrolled in URB 613.

## FEES

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

## COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)

1. Recognize the colonial narratives and norms embedded into Vancouver's tangible and intangible cultural landscapes and planning approaches.
2. Understand certain alternative stories, understandings, cultural practices, laws, and initiatives in cultural planning from an Indigenous point of view, with a particular focus on those within Musqueam, Squamish, and Tsleil-Waututh Nation traditions.
3. Learn the steps that Vancouver has taken to decolonize cultural planning and how the contribution and meaning of these steps can be critically examined and assessed.
4. Listen to Indigenous voices offer ways to advance additional changes to colonial practices in favour of cities that are safer for Indigenous peoples, more respectful of Indigenous knowledges, traditions, and cultures, and transformative in terms of colonial reconciliation and decolonization goals.

## FEEES

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

## COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)

1. Students will be introduced to key organizing concepts around which scholars understand and analyze the topic of "women in/and cities". Students will examine the rationale and implications of employing specific categories of analysis and conceptual frameworks.
2. Students will recognize the role of municipal government and the mix of responsibilities in Canadian cities. Students will consider the multiple levels of governance that are at play in addressing the needs and demands of women in Canada and beyond.
3. Students will examine specific cases related to women in cities: from key issues like mobility and safety, to strategies and solutions like secure housing and equity lens policy. Emphasis will be on Canadian municipal policies and practices.
4. Students will learn and apply research and analytical skills to produce work that demonstrates cumulative understanding of the course themes and materials. Students will have the option to work on a project with an NGO focused on feminist municipal activism.

RATIONALE FOR INTRODUCTION OF THIS COURSE
Offered in summer 2020 and 2021 as STT course and as an ISS field school (virtual).
Evaluations from initial 2020 offering, even constrained by the COVID-19 pandemic, with 85% of students reporting the course met its objectives mostly or perfectly; 77% reporting course material was communicated mostly excellently or excellently.
Good outcomes suggest regularization and instructional resources for this course have been built in to the coming two year plan in Urban Studies.
This course could be cross-listed with URB 691 depending on future enrollment The cross listed courses would cover the same material, but have different assignments and grading scales. In the event of cross listing, only undergraduates would be enrolled in URB 497 and only graduate students would be enrolled in URB 691.

SCHEDULING AND ENROLLMENT INFORMATION

Effective term and year (e.g. FALL 2016) SUMMER 2022

## FEES

Are there any proposed student fees associated with this course other than tuition fees?  YES  NO

## COURSE – LEVEL EDUCATIONAL GOALS (OPTIONAL)

To advance hands-on understanding of Nordic sustainability planning and policy in cities, regions and nationally.

To assess the reputation of Nordic policy, planning and cultural leadership in urban sustainability.

To advance recognition of the ways in which local circumstances, histories and ways of life shape understandings of urban sustainability.

To enrich an understanding of concepts, practices and techniques of urban sustainability in the anglophone world with different concepts, terminologies, practices and techniques devised in non-Anglophone contexts.

To generate and contribute to meaningful intercultural and interdisciplinary discussions that may increase potential for fruitful international cooperation and understanding related to sustainability threats and opportunities.

**RESOURCES**

List any outstanding resource issues to be addressed prior to implementation: space, laboratory equipment, etc:

To be offered as a cross listed course with URB 691 International Field School, and as an ISS field school. Instructional resources for 2022 and 2023 already allocated within workload of 2 year TL Annika Airas. Subsequent years could be taught by Meg Holden or Anthony Perl.

**OTHER IMPLICATIONS**

Final exam required  YES  NO

Criminal Record Check required  YES  NO

**OVERLAP CHECK**

Checking for overlap is the responsibility of the Associate Dean.

Each new course proposal must have confirmation of an overlap check completed prior to submission to the Faculty Curriculum Committee.

COURSE SUBJECT ITAL NUMBER 360

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation Italian Literature as World Literature

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation Ital Lit World Lit

CAMPUS where course will be normally taught: [x] Burnaby [ ] Surrey [ ] Vancouver [ ] Great Northern Way [ ] Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box. Maps out Italian literature's contributions to world cultural heritage, in the form of one of the nation's great authorial voices, a particular period or movement, or a defining theme. Aims to tease out the ways in which these contributions are inscribed in a dynamic global matrix wherein cultures are negotiated and transformed through on-going dialogue and exchange. This course may be repeated once for credit when different topics are offered

REPEAT FOR CREDIT [x] YES [ ] NO Total completions allowed 2 Within a term? [ ] YES [x] NO

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit www.lib.sfu.ca/about/overview/collections/course-assessments.

RATIONALE FOR INTRODUCTION OF THIS COURSE

With the formation of the new Department of World Languages and Literatures from the merger of the World Literature Program and the Language Training Institute in January 2020, work began to better intertwine our curricula. This course, which explicitly foregrounds Italian literature texts in translation, can be taken both by students pursuing a WL major or minor, as well as serve as an elective for students who wish to complete the Italian Minor. The aim of this course is to introduce prominent Italian texts and/or genres that have traveled in translation and made an impact beyond the originally intended national audience. By demonstrating the significance of the chosen texts in both their domestic and foreign contexts, students will gain an insight into Italian culture and literature, as well as learn how these national products can also have an international presence, becoming influential with audiences outside their home context. In so doing, students will also learn, through a specific national case study, the cultural, historical, linguistic, and economic factors that allow a work of national literature to become world literature, and the transformations that texts undergo as a result.

**RATIONALE FOR INTRODUCTION OF THIS COURSE**

With the formation of the new Department of World Languages and Literatures from the merger of the World Literature Program and the Language Training Institute in January 2020, work began to better intertwine our curricula. With the addition of this course, we add a linguistically-specific offering to our WL curriculum, which has been until now exclusively cross-cultural. This course, which explicitly foregrounds Japanese texts in translation, can be taken by students pursuing a WL major or minor, but will also serve as an elective for students who wish to complete a Japanese certificate (currently under construction). By cross listing, we can make more efficient use of our limited faculty resources as well as ensure more robust enrollments in the course. The course will be designed in a blended (50% online/50% F2F) format.

The aim of this course is to introduce prominent Japanese texts and/or genres that have traveled in translation and made an impact beyond originally intended national audience. By demonstrating the significance of the chosen texts in both their domestic and foreign contexts, students will gain an insight into Japanese culture and literature, but also learn how these national products can also have an international presence, becoming influential with audiences outside their home context. In so doing, they will also learn, through a specific national case study, the cultural, historical, linguistic, and economic factors that allow a work of national literature to become world literature, and the transformations that texts undergo as a result.

Intro to Prob/Stat for CompSci

CAMPUS where course will be normally taught: [x] Burnaby [ ] Surrey [ ] Vancouver [ ] Great Northern Way [ ] Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.
This is an introductory course in probability and statistics that is designed for Computer Science students. Mainly covers basic probability theory and statistical methods for designing and analyzing computing algorithms and systems. Topics include continuous probability distributions, random variables, multivariate normal distributions, parameter estimation and inference theory, as well as design and analysis of statistical studies, including hypothesis testing and presentation of statistical data.

RATIONALE FOR INTRODUCTION OF THIS COURSE

With the rapid onset of machine learning, big data problems and predictive analytics, many STEM disciplines are undergoing changes in practice and teaching. The School of Computing Science at SFU wants their students to take an introductory probability and statistics course that provides them for this modern world and adequately prepares their students for various upper level courses in Computing Science. Some of the more computational topics that are introduced in this course and do not appear in STAT 270 include Gradient Descent, Introductory Bayes and Bootstrapping.
