MEMORANDUM

ATTENTION Senate

DATE February 16, 2023

FROM Jeff Derksen,
Chair of Senate Graduate Studies
Committee (SGSC)

RE: New Courses

For information:

Acting under delegated authority at its meeting of February 7, 2023, SGSC approved the following new courses, effective **Fall 2023**:

Beedie School of Business

New Courses:

- 1) BUS 800: Finance Foundations
- 2) BUS 806: Principles of Finance
- 3) BUS 881: Principles of Fund Management

Faculty of Science

Department of Biology

New Course:

- 1) BISC 633: Environmental Microbiology

Department of Earth Science

New Course:

- 1) EASC 629: Advanced Engineering Geology

Department of Molecular Biology and Biochemistry

New Course:

- 1) MBB 764: From Genome to System

Segal Graduate School

Office of the Associate Dean
500 Granville Street
Vancouver, BC V6C 1W6

TEL 778.782.9255
FAX 778.782.5122

busadmin@sfu.ca

Memo to SGSC

To: Senate Graduate Studies Committee
From: Andrew Gemino, Associate Dean, Graduate Programs
Re: MSc Calendar Changes for Fall 2023
Date: January 10, 2022

The following curriculum revisions have been approved by the Beedie School of Business and are forwarded to the Senate Graduate Studies Committee for approval. These curriculum items should be effective for **Fall 2023**.

Please include them on the next SGSC agenda.

- ~~Calendar description Change for MSc Finance. Course title/ language updates and changes to required credits. Elective language moved to within streams.~~
- New course proposals and minor course changes
- Course outlines to accompany proposals

Thank you for your attention herein. Should you have any questions or concerns, please do not hesitate to contact me.

Andrew Gemino
Associate Dean, Graduate Programs, Beedie School of Business

New Graduate Course Proposal

Course Subject (eg. PSYC) BUS	Number (eg. 810) 800	Units (eg. 4) 3
Course title (max. 100 characters) Finance Foundations		
Short title (for enrollment/transcript - max. 30 characters) Fin Foundations		
Course description for SFU Calendar (course descriptions should be brief and should never begin with phrases such as “This course will...” or “The purpose of this course is...” If the grading basis is satisfactory/unsatisfactory include this in the description) Essential mathematical, computational, and accounting topics for the MSc in Finance will be covered. Topics covered include an introduction to probability theory and statistics, basic accounting concepts and financial statements, good programming practices, the use of IDEs, and the Python programming language.		
Rationale for introduction of this course This course combines the previously split courses of BUS 877, 878 and 798 into one course. This will allow for greater flexibility in the introduction or topics/materials that align with the changing industry needs and special topics offerings in the program.		
Term of initial offering (eg. Fall 2019) Fall 2023	Course delivery (eg. 3 hrs/week for 13 weeks) 3hrs/ day, 4 days per week for 3 consecutive weeks	
Frequency of offerings/year 1/year	Estimated enrollment per offering 55	
Equivalent courses (courses that replicates the content of this course to such an extent that students should not receive credit for both courses)		
Prerequisite and/or Corequisite		
Criminal record check required? <input type="checkbox"/> Yes if yes is selected, add this as prerequisite		Additional course fees? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Campus where course will be taught <input type="checkbox"/> Burnaby <input type="checkbox"/> Surrey <input checked="" type="checkbox"/> Vancouver <input type="checkbox"/> Great Northern Way <input type="checkbox"/> Off campus		
Course Components * <input type="checkbox"/> Lecture <input checked="" type="checkbox"/> Seminar <input type="checkbox"/> Lab <input type="checkbox"/> Independent <input type="checkbox"/> Capstone <input type="checkbox"/> _____		
Grading Basis <input checked="" type="checkbox"/> Letter grades <input type="checkbox"/> Satisfactory/ Unsatisfactory <input type="checkbox"/> In Progress / Complete		
Repeat for credit? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Total repeats allowed? _____	Repeat within a term? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Required course? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	Final exam required? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Capstone course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Combined with a undergrad course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, identify which undergraduate course and the additional course requirements for graduate students:		

* See important definitions on the curriculum website.

BUS 800: Finance Foundations

Instructor: Frederick Willeboordse	Semester:
Email:	Note: (classroom #, blogs, etc.)
Phone:	Office:

Course Description

Essential mathematical, computational and accounting topics for the MSc in Finance will be covered. The mathematics part will focus on highlighting which mathematical skill are required to succeed in the program, and an introduction to probability and statistics. The computational part will cover good programming practices, the use of IDEs, and the basics of the Python programming language while the accounting part will cover basic accounting concepts and the basic financial statements.

Objectives

The objective of this course is to prepare students for the MSc program in Finance.

- Be familiar with introductory probability theory and basic econometrics
- Be able to write basic Python programs to download and analyze data
- Interpret basic financial statements

Course Expectations

Finance Foundations commences on **Date XX** and is completed on **Date XX**. During this time you can expect to spend a significant amount of time on this course unless you are already familiar with the materials. Please be aware that the MSc in Finance is a full-time program and that you need to be prepared to spend 40 hours or more on the program per week. There may be out of class activities. These out-of-class activities may include participating in online activities, preparing readings and cases, answering practice questions, doing library research and reviewing sources, conducting interviews, and project planning.

Courses may be scheduled in a compressed format where classes are held in intensive session, but expectations of consistent preparation and participation remain for the length of the semester.

Course Structure

This course may be offered through video lectures, in-person classes, online labs, in-person labs or a mixture of those.

Book and Materials

1. TBD

Learning and Assessments

Assessment summary

This is a required course and full participation is expected. Evaluation in the course will be based on individual activities and online participation.

Other Information

For most assignments, there will not be any makeups. If you miss an assignment due to illness, the usual procedure will be that you will be excused from that assignment after submitting a doctor's note, or other information as requested by the instructor.

Proper participation in the course is essential. With the exception of assignments for which you were excused *in writing* (usually this would be a documented illness), **you must complete all assigned work**. If you have unexcused missed assignments at the end of the semester, you will fail the course, even if your average is above the passing mark.

Academic integrity is essential, please see the information in the section below. However, I would like to stress that I consider enrolling in this course an implicit acknowledgement of your acceptance of SFU's academic integrity policies, and your acceptance of the validity of these policies throughout the entirety of the course whether or not these policies are explicitly repeated.

Course Policies

Online tools such as Turnitin, Kritik or others may be used. If so, this will be announced in class.

Use of Turnitin.com

At the discretion of the instructor, written work for this course will be submitted via Turnitin, a third-party service licensed for use by SFU. Turnitin is used for originality checking to help detect plagiarism. Students will be required to create an account with Turnitin, and to submit their work via that account, on the terms stipulated in the agreement between the student and Turnitin. This agreement includes the retention of your submitted work as part of the Turnitin database. Any student with a concern about using the Turnitin service may opt to use an anonymous identity in their interactions with Turnitin.

Students who do not intend to use Turnitin in the standard manner must notify the instructor at least two weeks in advance of any submission deadline. In particular, it is the responsibility of any student using the anonymous option (i.e., false name and temporary e-mail address created for the purpose) to inform the instructor such that the instructor can match up the anonymous identity with the student.

For more information see the Protection of Privacy section of the SFU calendar.

Use of Zoom

Lectures delivered on Zoom may be recorded by your instructor. As a result, Simon Fraser University may collect your image, voice, name, personal views and opinions, and course work under the legal authority of the University Act and the Freedom of Information and Protection of

Privacy. This information is related directly to and needed by the University to support student learning only (i.e., posting in the Learning Management System for students to review). If you have any questions about the collection and use of this information please contact your instructor.

Reading and Course Schedule

Readings can be found on Canvas, your textbook and through external links. They are labeled accordingly.

Please ensure that citations are in full APA (or other popular citation style), in order to ensure that the correct version of cases and articles are obtained for your course, and that copyright law is met.

Academic Integrity

SFU's Academic Integrity web site <http://www.sfu.ca/students/academicintegrity.html> is filled with information on what is meant by academic dishonesty, where you can find resources to help with your studies and the consequences of cheating. Check out the site for more information and videos that help explain the issues in plain English.

Each student is responsible for his or her conduct as it affects the University community. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University. Furthermore, it is unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University. <http://www.sfu.ca/policies/gazette/student/s10-01.html>

ACADEMIC INTEGRITY: YOUR WORK, YOUR SUCCESS

BUS 806: Principles of Finance

Instructor: Frederick Willeboordse, Christina Atanasova	Semester: Fall
Email:	Note: (classroom #, blogs, etc.)
Phone:	Office: HC 7000

Course Description

A general introduction to finance is provided. Topics covered include the time value of money, discounted cash flow techniques, types of financial securities, capital budgeting, risk and return trade-offs and capital market efficiency.

Objectives

The objective of the course is to assist students to acquire an understanding of the fundamental principles and issues in financial management. Upon completion of the course, participants should be able to define basic terminology, understand the theoretical relations and apply the analytical techniques covered in the course to various decision-making situations.

Problem solving, analytical and decision-making skills will be practiced through exercises and problem assignments (generally with the help of a spreadsheet).

Course Expectations

Preparation commences on **Date XX** and is completed on **Date XX**. During this time you can expect to spend a significant amount of time on this course unless you are already familiar with the materials. Please be aware that the MSc in Finance is a full-time program and that you need to be prepared to spend 40 hours or more on the program per week. There may be out of class activities. Phone: 1.604.862.9291

Office: Segal 4600

Course Description

This course provides an introduction to managing stock and bond portfolios, and is a pre-requisite to working on the SIAS Endowment Fund. The course will cover investment policy, allocation of assets to different asset classes, selecting specific securities, managing portfolio risk, an introduction to fixed income investing, and reporting to clients.

Objectives

Completion of the course will enable students to participate in making responsible investment decisions for part of SFU's endowment. Students should be able to:

- Understand the SIAS Investment Policy Statement (IPS) and use it as a guide to portfolios that comply with the client's expectations
- Articulate recommendations for an optimal mix of fixed income and equity securities
- Use tools like Bloomberg and CapitalIQ to analyze potential investments
- Select securities for inclusion in different types of stock and bond portfolios, with a focus on global portfolios
- Measure risk in different portfolios, and understand how to use risk tools to inform decisions on portfolio weights
- Apply Environmental, Social and Governance (ESG) standards in stock and bond selection
- Make decisions on credit risk for corporate and provincial bonds
- Build fixed income portfolios that conform to different economic outlooks and risk objectives
- Present investment strategies and performance to a client

Course Expectations

The class starts on **September 15, 2023** and is completed on **November 17, 2023**. During this time you can expect at least 10 hours of out-of-class work weekly for each course. These out-of-class activities will include, participating in online activities, preparing readings and cases, answering practice questions, doing library research and reviewing sources, conducting interviews, and project planning.

Courses may be scheduled in a compressed format where classes are held in intensive session, but expectations of consistent preparation and participation remain for the length of the semester.

Course Structure

This course is built around a case: a real portfolio of over \$20 million in fixed income, Canadian stocks, and global stocks. During the course, students will be working as advisors to the investment

managers in the previous cohort. By the end of the course, students will have an organized themselves into teams, interviewed for leadership roles, and will take over the management of the fund. This will include choosing stocks and bonds, placing trades, monitoring performance, ensuring compliance with investment policy, and implementing a risk budget.

Book and Materials

1. There is no textbook for the class. Students should create a logon on the Bloomberg terminal and request that SIAS portfolios be shared with them. Students may want to buy any edition of Reilly Brown *Investment Analysis & Portfolio Management*, which covers many of the concepts in the course.
2. Students must complete Bloomberg’s certification course, which is available at <https://portal.bloomberforeducation.com/>. To get credit for the material, use the code PX67CDBJYS. Five points will be deducted from the attendance score if this is not completed by the deadline.

Learning and Assessments

Assessment summary

Evaluation in the course will be based on a combination of group and individual work. As in all large courses in the Beedie School of Business, grading norms will be observed. In other words, students with the top marks relative to the class average will receive the top grades.

**** Please remember that as per graduate grading policies, group assignments should not add up to more than 50% of the total grade.**

Individual	Weekly Quizzes / Attendance / completion of Bloomberg certification	10%
	Assignment 1: Optimize mix of three asset classes	10%
	Assignment 2: Build global equity portfolio	20%
	Midterm 1	20%
	Midterm 2	20%
Group	Assignment 3: Client Presentation	20%
	Total	100%

Assignment 1: Asset Allocation

Due: September 29, 2023 at 6:00 PM

Using a supplied spreadsheet of historical investment returns from the three asset classes in which SIAS invests, use a modern portfolio theory framework to find an optimal mix of the three assets. Contrast that result with an allocation based on the Black Litterman model.

Note for instructors:

Format	Excel workbook
File Format	Name.xlsx
Length	<ul style="list-style-type: none"> Use workbook supplied with assignment
Submission	Canvas
Printed copy	No
In-class discussion or presentation	From randomly selected students
Other notes	
<ul style="list-style-type: none"> The objective of this exercise is to analyze the results of using historical returns in an optimization problems, and to explore alternatives that fit students' outlook for future returns. 	

Assignment 2: Build Global Equity Portfolio

Due: October 23, 2023 at 6:00 PM

Using the MSCI All-Country World Index as an investment universe, select several stocks from a subsector of the market that 1) have a liquid market in USD 2) have a favourable mix of attributes in growth, value, quality, sentiment, and ESG.

Format	Presentation on the proposed portfolio
File Format	Name.pptx
Length	<ul style="list-style-type: none"> 10 pages
Submission	Canvas
Printed copy	No
In-class discussion or presentation	From randomly selected students
Other notes	
<ul style="list-style-type: none"> The current global portfolio is comprised of US stocks and passive ETFs for the rest of the world. This cohort is going to transition the fund into a true global portfolio. This assignment will provide a framework for trading into a better global equities portfolio for SIAS. 	

Assignment 3: Client Presentation

Due: November 6, 2023 at 6:00 PM

Working in groups of 4-6 students, build a presentation on the investment strategy and performance of the SIAS fund during the most recent quarter.

Format	Quarterly Update on the SIAS portfolio
File Format	Name.pptx
Length	<ul style="list-style-type: none"> 16 pages
Submission	Canvas
Printed copy	No
In-class discussion or presentation	Each group will have 15 minutes to make their presentations.
Other notes	
<ul style="list-style-type: none"> This is a dry run for the first SIAS presentation that the 2022 cohort will make to an actual advisory panel in May 2023. 	

Mid-term 1

On: October 20, 2023 at 2:15 PM

Exam will be in-class and will be one hour in length. 1-5 of the course material.

Format	Written document on paper. Students can bring only a writing implement and a calculator.
File Format	Paper
Length	<ul style="list-style-type: none"> 10 questions (some multi-part) Approximately 10 pages.
Submission	In person
Printed copy	Yes
In-class discussion or presentation	In class
Other notes	
<ul style="list-style-type: none"> Must have a real calculator, not an app on a phone. No formula sheets will be allowed, just a pencil and a calculator. 	

Mid-term 2

On: October 20, 2023 at 2:15 PM

Exam will be in-class and will be one hour in length. 1-5 of the course material.

Format	Written document on paper. Students can bring only a writing implement and a calculator.
File Format	Paper
Length	<ul style="list-style-type: none"> • 10 questions (some multi-part) • Approximately 10 pages.
Submission	In person
Printed copy	Yes
In-class discussion or presentation	In class
Other notes <ul style="list-style-type: none"> • Must have a real calculator, not an app on a phone. • No formula sheets will be allowed, just a pencil and a calculator. 	

Participation

Ten percent of the grade will be based on participation. Participation will be assessed based on weekly attendance, which may include quiz questions to assess learning. Five points will be deducted from students that fail complete the Bloomberg certification by the deadline.

Reading and Course Schedule

The Bloomberg certification will require 20-30 hours of study depending on students' familiarity with stocks and bonds. Because this course is based on using existing portfolios as a case study, there is no textbook for the course.

Session 1 (9/15/2023)

Investments, Returns and risk

- Measuring returns from price and dividends
- Compound returns
- Measures of volatility
- Asset classes

Session 2 (9/22/2023)

Portfolios and Portfolio Management

- Introduction to Assignment 1, Asset Allocation
- Modern Portfolio Theory

- Active vs. Passive Investment Strategies
- Long-only vs. Long-short portfolios

Session 3 (9/29/2023)

Portfolios and Portfolio Management

- Introduction to Assignment 2: Building a Global Equity Portfolio
- Brinson decomposition
- Factor-based portfolios
- Z-score ranking and weighting

Session 4 (10/6/2023)

Asset Valuation

- Value, Growth, Quality, Sentiment and ESG
- Valuing zero coupon and bullet bonds
 - DCF calculations
 - Perpetuities
 - DCF vs. Comparable Analysis

Session 5 (10/13/2023)

Portfolios and Portfolio Management

- CAPM, Risk-free Rates and Beta
- Cost of Equity and Cost of Capital
- Regression Beta and Blume Adjustment
- Fundamental Beta
- Quality Factor for Assignment 2: ROE vs K_e
- DDM and cash flow models

Session 6 (10/20/2023)

First midterm exam

- Portfolio performance reporting
 - Brinson-Fachler model
 - Factor-based attribution

Session 7 (10/27/2023)

Investment Risk

- Position weights in portfolios
- Total vs. active risk
- Measuring tracking error and forecasting active risk

Session 8 (11/3/2023)

Fixed Income Valuation and Security Selection

- Credit Analysis
- Duration and Convexity

Session 9 (11/10/2023)

Fixed Income Portfolio Management
Student Presentations

Session 10 (11/17/2023)

Second midterm exam
Student Presentations

Academic Integrity

SFU's Academic Integrity web site <http://www.sfu.ca/students/academicintegrity.html> is filled with information on what is meant by academic dishonesty, where you can find resources to help with your studies and the consequences of cheating. Check out the site for more information and videos that help explain the issues in plain English.

Each student is responsible for his or her conduct as it affects the University community. Academic dishonesty, in whatever form, is ultimately destructive of the values of the University. Furthermore, it is unfair and discouraging to the majority of students who pursue their studies honestly. Scholarly integrity is required of all members of the University. <http://www.sfu.ca/policies/gazette/student/s10-01.html>

ACADEMIC INTEGRITY: YOUR WORK, YOUR SUCCESS

About the Course Instructor

Glenn Powers is an Associate Professor of Practice at SFU, where he has been teaching graduate and undergraduate finance courses since 2015. He currently serves as the industry advisor to the BEAM fund (managed by undergraduate students) and SIAS fund (managed by students in the MSc Finance program).

Prior to joining SFU, Glenn worked at BCi, where he led a team managing the Global Thematic equity portfolios. Prior to that, he was a portfolio manager in Canadian Equities in BCi. During his career, Glenn has worked in management consulting, sell-side research, investment banking, and investment management.

Glenn has a masters in financial risk management (MFRM) from SFU and is a CFA charter-holder.

MEMO

**Faculty of
Science**

ATTENTION: Senate Graduate Studies Committee

FROM: Vance Williams, Associate Dean Graduate Studies,
Faculty of Science

RE: Proposed Course ~~Changes and~~ Additions for Fall 2023,
Faculty of Science

DATE: January 11, 2023

Dear SGSC,

The following curriculum changes have been approved by the Faculty of Science and are being submitted to the Senate Graduate Studies committee for approval.

~~The following course deletions have been proposed:~~

~~MBB 726 Immune System I~~

~~MBB 728 Microbial Pathogenesis~~

~~The following course changes have been proposed:~~

~~EASC 810 MSc Proposal~~

~~MBB 669 Special Topics in Genomics~~

~~MBB 727 Immune System II~~

~~ONC 510 Seminar in Oncology~~

The following *new courses* are being proposed:

EASC 629 Advanced Engineering Geology

MBB 764 From Genome to Systems

BISC 633 Environmental Microbiology

Enclosed are the documents in support of these changes.

Sincerely

Vance Williams
Associate Dean Graduate Studies, Faculty of Science

To: Faculty of Science Graduate Studies Committee
From: Michael Hart, BISC Graduate Program Chair
Re: New course BISC 633 Environmental Microbiology
Date: 12 January 2023

This new course has been approved by the Department of Biological Sciences and is being forwarded to the Faculty of Science Graduate Studies Committee for review and approval. The change should be effective Fall 2023.

The new course is an addition to the curriculum for the Master's in Environmental Toxicology program and will be taught by our newest MET faculty member (Dr. Jane Fowler).

A handwritten signature in black ink, consisting of the letters 'M' and 'H' with several vertical strokes extending downwards from the 'H'.

Michael Hart, BISC Graduate Program Chair

New Graduate Course Proposal

Course Subject (eg. PSYC)	BISC	Number (eg. 810)	633	Units (eg. 4)	3
Course title (max. 100 characters)					
Environmental Microbiology					
Short title (for enrollment/transcript - max. 30 characters)					
Environmental Microbiology					
Course description for SFU Calendar (course descriptions should be brief and should never begin with phrases such as "This course will..." or "The purpose of this course is..." If the grading basis is satisfactory/unsatisfactory include this in the description)					
An overview of environmental and applied microbiology. Topics include microbial growth and kinetics, microbial metabolism and thermodynamics, biogeochemical cycling, microbial ecology, applied microbiology as well as analysis of microbial community data in the lab. Students will write a review paper and disseminate their results to the class and lead discussions with undergraduate students.					
Rationale for introduction of this course					
This course will provide a graduate offering in environmental microbiology, which is needed within BISC and Faculty of Environment. It will also serve as an elective course for the Masters of Environmental Toxicology program.					
Term of initial offering (eg. Fall 2019)			Course delivery (eg. 3 hrs/week for 13 weeks)		
Fall 2023			2h lecture/ week, 3h lab		
Frequency of offerings/year			Estimated enrollment per offering		
1			8		
Equivalent courses (courses that replicates the content of this course to such an extent that students should not receive credit for both courses)					
BISC 433					
Prerequisite and/or Corequisite					
BISC 303, or an equivalent introductory microbiology course (or permission from the instructor)					
Criminal record check required? <input type="checkbox"/> Yes if yes is selected, add this as prerequisite				Additional course fees? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Campus where course will be taught <input checked="" type="checkbox"/> Burnaby <input type="checkbox"/> Surrey <input type="checkbox"/> Vancouver <input type="checkbox"/> Great Northern Way <input type="checkbox"/> Off campus					
Course Components * <input type="checkbox"/> Lecture <input type="checkbox"/> Seminar <input checked="" type="checkbox"/> Lab <input type="checkbox"/> Independent <input type="checkbox"/> Capstone <input type="checkbox"/>					
Grading Basis <input checked="" type="checkbox"/> Letter grades <input type="checkbox"/> Satisfactory/ Unsatisfactory <input type="checkbox"/> In Progress / Complete					
Repeat for credit? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		Total repeats allowed? <u>0</u>		Repeat within a term? <input type="checkbox"/> Yes <input type="checkbox"/> No	
Required course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		Final exam required? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		Capstone course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Combined with a undergrad course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, identify which undergraduate course and the additional course requirements for graduate students:					
BISC 433, grad students write a review paper and teach their topic to undergrads in a lecture. They will also lead small group discussions with undergraduate students and conduct lab assignments independently rather than in groups.					

* See important definitions on the curriculum website.

BISC 633 – Environmental Microbiology

Course Details:

This course is an overview of environmental and applied microbiology. It will consist of a combination of lectures, computer labs and completion and dissemination of a project on a relevant topic of student's choosing. Lecture topics will include microbial growth and kinetics, thermodynamics and microbial metabolism, biogeochemical cycling, microbial ecology, and applied microbiology.

The lab will familiarize students with methods for analysing microbial communities, and how to analyze and visualize results from these types of data.

Learning objectives

Have an in-depth understanding of growth, metabolism and energy conservation in microorganisms

Understand basic ecological and evolutionary processes that impact microbes

Discuss and describe the contribution of microorganisms to global biogeochemical cycling and provisioning of ecosystem services

Be familiar with biotechnological applications of microbial communities in natural and engineered environments

Have in-depth knowledge of the roles of microorganisms in the natural process or biotechnological application of your choosing

Effectively communicate scientific information in oral and written formats

Analyse and present microbial community datasets using appropriate methods

Grading

Midterm exam: 20%

Final exam: 30%

Lab assignments: 20%

Project: 20%

Prerequisites

BISC 303 or permission of the instructor. A basic knowledge of microbiology is required.

Required readings

There is no official course textbook. Readings will be assigned from a variety of sources including textbooks and primary literature. Recommended readings/ course resources include Brock Biology of Microorganisms 15th Ed. (available in reserves at the library), and Environmental Microbiology: From Genomes to Biochemistry, E. Madsen 2nd Ed (available online from the library).

From: Gwenn Flowers, EASC Graduate Program Chair
Re: Course ~~change: EASC 810 &~~ EASC 629
Date: 19 Dec 2022

The following has been approved by the Department of Earth Sciences and is forwarded to the Faculty Graduate Studies Committee for approval:

~~EASC 810: course change from 0 units to 3 units~~

EASC 629: New Course

This change should be effective for Fall 2023.

Gwenn Flowers, EASC Graduate Program Chair

New Graduate Course Proposal

Please save the form before filling it out to ensure that the information will be saved properly.

Course Subject (eg. PSYC)	EASC	Number (eg. 810)	629	Units (eg. 4)	3
Course title (max 100 characters including spaces and punctuation) Advanced Engineering Geology					
Short title (for enrollment/transcript - max 30 characters) Advanced Engineering Geology					
Course description for SFU Calendar * Application of engineering geology and geotechnics to geohazards and engineering projects. Topics include: Engineering geological characterization; slope failure mechanisms; stability analysis methods; seismically induced landslides; remote sensing tools; slope and tunnel reinforcement; geotechnical site assessment for engineering construction. Case studies illustrate the influence of geotechnics in resource industries.					
Rationale for introduction of this course This course enables graduate students whose research will include a component of engineering geology or geotechnics to access this area of specialization of the instructor. The course is designed to provide a graduate level understanding of engineering geology and its application to natural hazards or geotechnical problems that is not met by any graduate courses currently offered by Earth Sciences or other departments at SFU.					
Effective term and year Fall 2023			Course delivery (eg 3 hrs/week for 13 weeks) 5 hrs/week for 13 weeks (2 hrs lect. & 3 hr lab/seminar)		
Frequency of offerings/year Every 2nd year			Estimated enrollment/offering 2-10		
Equivalent courses (These are previously approved courses that replicate the content of this course to such an extent that students should not receive credit for both courses.) Offered in conjunction with EASC413. No equivalent graduate courses.					
Prerequisite and/or Corequisite ** EASC313 or permission of instructor					
Criminal record check required? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, then add this requirement as a prerequisite.					
Campus where course will be taught <input checked="" type="checkbox"/> Burnaby <input type="checkbox"/> Surrey <input type="checkbox"/> Vancouver <input type="checkbox"/> Great Northern Way <input type="checkbox"/> Off campus					
Course Components <input checked="" type="checkbox"/> Lecture <input checked="" type="checkbox"/> Seminar <input checked="" type="checkbox"/> Lab <input type="checkbox"/> Research <input type="checkbox"/> Practicum <input type="checkbox"/> Online <input type="checkbox"/>					
Grading Basis <input checked="" type="checkbox"/> Letter grades <input type="checkbox"/> Satisfactory/Unsatisfactory <input type="checkbox"/> In Progress/Complete				Capstone course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Repeat for credit? *** <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		Total completions allowed? <u>1</u>		Repeat within a term? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
Required course? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		Final exam required? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		Additional course fees? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
Combined with an undergrad course? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If yes, identify which undergraduate course and what the additional course requirements are for graduate students:					

EASC413. Graduate students will carry out individual research on selected topics to be presented in a seminar, and run a term-long project including field and computational modelling components, with use of advanced remote sensing equipment and specialized software.

* Course descriptions should be brief and should never begin with phrases such as "This course will..." or "The purpose of this course is..." If the grading basis is satisfactory/unsatisfactory include this in the description.

** If a course is only available to students in a particular program, that should be stated in the prerequisite.

*** This mainly applies to a Special Topics or Directed Readings course.

RESOURCES

If additional resources are required to offer this course, the department proposing the course should be prepared to provide information on the source(s) of those additional resources.

Faculty member(s) who will normally teach this course

Sergio Sepulveda. Adjunct faculty Davide Elmo, Sonia D'Ambra, Marc-Andre Brideau would also be qualified to

Additional faculty members, space, and/or specialized equipment required in order to offer this course

Remote sensing equipment from the EASC Engineering Geology laboratory will be used in fieldwork.

MOLECULAR BIOLOGY AND BIOCHEMISTRY

Memorandum

To: Chair, Faculty Graduate Studies Committee,
Faculty of Science

From: Christopher Beh, MBB Graduate
Program Chair

~~Re: Graduate Course Changes: MBB 669,
MBB 727 & ONG 510;
Course deletions: MBB 726 & MBB 728;
New Graduate Course: MBB 764~~

Date: May 18, 2022

We are requesting approval of the following:

~~1. GRADUATE COURSE CHANGES~~

- ~~a. MBB 669: Special Topics in Genomics – course number, title, description & prerequisites (form attached)~~
- ~~b. MBB 727: Immune System II: Immune Responses in Health and Disease – title & prerequisites (form attached)~~
- ~~c. ONG 510: Seminars in Oncology – description (form attached)~~

~~2. GRADUATE COURSE DELETIONS~~

- ~~a. MBB 726: The Immune System I: Basis of Innate and Adaptive Immunity (form attached)~~
- ~~b. MBB 728: Microbial Pathogenesis (form attached)~~

3. NEW GRADUATE COURSE PROPOSALS

- a. **MBB 764: From Genome to System** (form and outline attached)

We were hoping these changes can be submitted to Grad Studies for their next deadline of June 8, 2022 at noon.

Sincerely,

Dr. C.T. Beh

MBB 764: FROM GENOME TO SYSTEM (3)

Course outline

CALENDAR DESCRIPTION:

Methods that enable the integration of Biochemical, Genetic and Genomic knowledge (BiGG) to reconstruct a genomic scale network that defines the metabolic physiology of an organism will be explored. Applications of these approaches in the fields of microbial evolution, interaction networks, genetic engineering and drug discovery will be discussed.

COURSE DETAILS:

The process of extracting biochemical content from genome annotations and literature sources to computationally catalog and interconnect the metabolic pathways available to the cell (i.e., metabolic reconstruction) is well established and has been carried out for a growing number of organisms on the genome scale. Such network reconstruction has led to the development of modeling approaches that gain a better understanding of the observable phenotypes and coordinated functions of the cell. As a result, these approaches are being used to apply and develop *in silico* models for biological discovery and engineering applications.

In this course we will cover conceptually some methods that enable the integration of Biochemical, Genetic and Genomic knowledge (BiGG) to reconstruct a genomic scale network that defines the metabolic physiology of an organism. We will also describe through examples computational models that integrate high-throughput data sets for prospective experimentation and validation. Finally, we will show how valuable and relevant these approaches are at making important biological predictions that can be validated experimentally. Applications in the fields of microbial evolution, interaction networks, genetic engineering and drug discovery will be discussed through student presentations.

LECTURE TOPICS:

- What is System Biology?
- Network reconstruction from biological data
- Genomic scale reconstruction of prokaryotes
- Genomic scale reconstruction of eukaryotes
- Biochemical networks
- Genome metastructures
- Biochemically, Genomically and Genetically structured database (BiGG)
- Properties of reconstituted networks
- Phenotype potential of reconstituted networks
- Applications in microbial evolution, genetic engineering, drug discovery, environmental science, synthetic biology and biomedicine

Grading

- 2 Midterm Exams (2x30%) – 60%
 - Paper presentation and participation – a written proposal aimed at answering a biological question using the concepts and tools developed in class will be evaluated – 40%
-
