

SIMON FRASER UNIVERSITY
Continuing Studies

Memorandum

To: Senate

From: J. Colin Yerbury, Dean, Continuing Studies

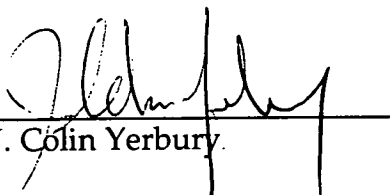

Date: December 15, 2004

Re: **Annual Report to Senate for the Year 2003/2004 of the Senate Committee on Continuing Studies**

Enclosed for Senate's information is the Senate Committee on Continuing Studies Annual Report for the Year 2003/2004.

This report concerns the continuing studies activities sponsored and offered by University departments and as such is not a report on the Continuing Studies administrative unit.

The statistics on the credit programs are complete and further details can be obtained from the Office of Analytical Studies. Statistics on community and professional (non-credit) programs are based on reports from departments and may not include all courses and public lectures organized and sponsored by departments. However, most of what the University does in non-credit programs, particularly those directed to the broader community, is represented in these statistics.

J. Colin Yerbury

Encl.

**Simon Fraser University
Senate Committee on Continuing Studies
Annual Reports to Senate
For the 2003/2004 Year**

Composition and Mandate

The current membership of the SCCS is the Dean (chair), Librarian, four faculty members, two at-large members, one lay member and one student (see Appendix A). The SCCS normally meets twice each year, once during the fall semester, and once during the spring.

SCCS is responsible to Senate for policy with respect to the overall development of the University's continuing education credit and non-credit programs. The Committee also reviews at regular intervals existing and proposed non-credit programs; develops procedures for the approval of various categories of credit-free instruction; and receives for consideration and approval programs proposed as suitable for non-credit certificate granting status. The SCCS reports at least once annually to Senate.

Actions of the SCCS in 2003-2004

The SCCS met in November 2003, at which time both the Two-Year Report to Senate and revisions to the "Criteria and Guidelines for the Establishment of Certificates for Successful Completion of Programs of Non-degree courses" were approved. Senate approved the revisions to the "Criteria and Guidelines for the Establishment of Certificates for Successful Completion of Programs of Non-degree courses" on January 5, 2004.

The SCCS met in April 2004, at which time recent non-credit certificate and diploma graduates were approved and the following program names changes from certificate to diploma were approved:

- Management Skills in Advanced Technology Program
- Advanced Interpreter Certificate Program

Course Offerings and Enrolments in 2003-2004

Credit programs: The Centre for Integrated and Credit Studies (CICS) in Continuing Studies is primarily responsible for administering, at Harbour Centre, credit courses that support the efforts of part-time students to

complete a certificate, diploma, or minor program in a number of fields. Courses are planned in coordination with Faculties, schools and departments and funded by special stipends. The CICS is also responsible for the Integrated Studies cohort-based degree completion programs leading to the Bachelor of General Studies, and for the Seniors Program.

There was a slight decrease in the number of courses offered in 2003-2004 (from 221 in 2002-2003 to 212). However, there was an increase in enrollment (10%) and in FTE's (7.39%) due to increases in class sizes. See Appendix B-1 for details.

Distance education: The Centre for Online and Distance Education (previously known as the Centre for Distance Education) is responsible for working in partnership with academic units to develop and deliver courses for students who require or prefer an alternative to on-campus study. Increasingly, this involves the inclusion of online opportunities for teaching and learning. The Centre is committed to the pedagogically sound use of technology and works with faculty members to ensure that their particular approach to teaching is captured in the distance and online mode.

CODE continues to work with academic departments and faculty in the development of online courses. Program areas receiving special attention include Kinesiology, Gerontology, Communication, Criminology, and the non-credit Technical Writing Program. See Appendix B-2 for details including figures for online course components.

Non-credit certificate and diploma programs: The Senate Committee on Continuing Studies routinely reviews the non-credit certificate and diploma programs. Representing a broad variety of disciplines, these programs provide students with opportunities to complete specialized programs and receive certificates in recognition of their work. Developed in association with university faculty members and professional organizations, the quality of the non-credit certificate programs is assured through review by academic program advisory committees and an established evaluative process. 52 students have been approved by the SCCS and graduated from these programs over the past year. In addition, these students have been granted alumni status.

Frequently spawning new, complementary short courses, workshops and seminars, the non-credit certificate programs demonstrate Continuing Studies' commitment to facilitating and fostering academic and community partnerships in the development of new programs. Registrations in non-credit programs represent approximately 48% of Continuing Studies registrations. See Appendix B-3 for details of non-credit registrations.

New Initiatives

Continuing Studies is extending its programming to SFU Surrey. Building on the successes of the credit Integrated Studies Program, CMA FastTrack Program, Heritage Language programs, and the Writing and Publishing program course offerings that have already begun at the Surrey campus, Continuing Studies is developing a plan to expand programming opportunities to meet the needs of the South Fraser community.

APPENDIX A

Senate Committee on Continuing Studies, 2003 - 2004 Members

Colin Yerbury, Chair
Jan van Aalst, Education
Jim Budd, SFU Surrey
Lynn Copeland, Library
Muneer Esmail, Student
Rob Gordon, Criminology
Barry Honda, Molecular Biology/Biochemistry
Adam Horvath, Faculty of Education
Gary Mauser, Business Administration
James McArthur, Lay Senator
