SIMON FRASER UNIVERSITY

Office of the Vice-President, Academic

MEMORANDUM

To:

Senate

From:

J. M. Munro

Chair, Senate Committee on Academic Planning

Subject:

Department of Linguistics -

Date:

June 15, 1992

J. Al- Alumo

Changes to Graduate Programs

Action undertaken by the Senate Graduate Studies Committee and the Senate Committee on Academic Planning (SCAP 92 - 28) gives rise to the following motion:

Motion:

"That Senate approve and recommend approval to the Board of Governors

as set forth in S.92 - 48, the changes to the graduate programs in the Department of Linguistics including the following new courses:

LING 809 - 4 Morphology
LING 820 - 4 Formal Linguistics
LING 821 - 4 Phonetics
LING 896 - 4 Directed Research

LING 897 - 4 Research Seminar."

PROPOSED CHANGES

From: MA Program

Credit and Research Requirements
Students must select 16 of the total of 20 credit hours from the series LING 800 through 808. All students are further required to take an additional course on an S/U basis, to be chosen by the student and Supervisory Committee.

To: MA Program

Credit and Research Requirements

a. Course Work

Students must complete at least 20 credit hours of course work in Linguistics, including LING 800 and LING 801.

Rationale:

The Department aims to standardize its M.A. requirements, and ensure that all students take courses in the core areas of Phonology and Syntax. Furthermore, we find that our students are taking a sufficient number of variety of courses, so that the requirement of an additional course on an S/U basis is superfesous.

New Section

b. Thesis

All students in the program must complete an M.A. thesis based on original research. Students must comply to the university regulations on completing and defending the thesis.

Rationale:

This requirement is already stated in the overview of requirements for degrees in Languages and Linguistics. We repeat this in the entry specifically dealing with Linguistics for clarification.

From: PhD Program

Credit and Research Requirements

Candidates will complete a program of courses consisting of at least
16 credit hours, with the approval of the Supervisory committee.

When the Supervisory Committee is satisfied that the student is
adequately prepared, the student will proceed to the comprehensive
examination and dissertation as laid down under the program
requirements above.

To: PhD Program

Credit and Research Requirements

a. Course Work Students complete at least 16 credit hours of Linguistics courses, approved by the Supervisory Committee.

b. Thesis Proposal

Each candidate is required to develop a Research Proposal for a thesis based on original research. The proposal will define the intended research and the relationship between it and existing scholarship. The proposal will be presented to the Supervisory Committee for approval and presented as a colloquium.

c. PhD Thesis

Students must complete the thesis in accordance with University Regulations.

Rationale:

We have felt the need in our department to have more input into our students' theses at an earlier stage of preparation. Thus, we will require our students to present a thesis proposal. The thesis proposal has two components. First, it will require the students to prepare a detailed review of previous research on a specific topic. This function is currently met by a comprehensive examination, which is rendered redundant by the thesis proposal. Second, the thesis proposal outlines the original research to be undertaken by the student and presents a partial analysis or pilot study on the topic.

From:

LING 801-4 Morphology and Syntax

To:

LING.801-4 Syntax

LING.809-4 Morphology (New Course)

(see attached course proposals)

Rationale:

There is insufficient time to appropriately cover both areas in a single course.

New Courses:

LING.820-4 Formal Linguistics

LING.821-4 Phonetics

LING 896-4 Directed Research

LING 897-4 Research Seminar

(See attached New Course Proposal

Rationale:

We seek to offer more courses in two central areas of Linguistics-phonetics and morphology. As part of the department's focus on Cognitive Science and Computational Linguistics, we plan to regularly offer a course on Formal Linguistics. Finally, we wish to have two on-going courses providing for Independent Study and a forum to discuss research (the latter to be taken on an S/U basis). We note that most departments in the faculty already have such courses included in their offerings.

Linguistics 809

Morphology

Course Outline

Department of Linguistics

Fall 1993

Course Chairman:

Dr. Richard C. DeArmond

Office:

CC 8300

Phone:

3545

Course Description:

Linguistics 809 is an advanced course covering morphology. The course will cover advanced topics of morphology such as non-linear approaches to morphology, level ordering, constituent structure of words, syntactic affixation, grammatical relations, compounds, clitics, the word, and the place of morphology in grammar.

Course Textbooks:

Morphological Theory by Andrew Spencer. (Basil Blackwell, Ltd., 1991; Oxford and Cambridge, MA).

Morphology, by J. Jensen ((Benjamins, 1978; Mastered).

Morphology: the descriptive Analysis of Words, by E. Nida. (University of Michigan Press, 1949; Ann Arbor).

The Syntax of Words, by E. Selkirk. (MIT Press, 1986; Cambridge).

Structure of Course:

The course will be combined with L423. Three hours will overlap with 423, and one hour will be devoted to advanced topics. There will be one mid term exam and one final paper. The topic of the paper will be selected through consultation.

and theory.

DEPARTMENT OF LINGUISTICS

Linguistics 820-4
Introduction to Formal Linguistics

Course Chair:

Course Description:

This course provides the mathematical background for modern linguistics work in syntax, semantics and general computational linguistics. It introduces set theory, including finite and infinite sets, theory of relations and functions, formal logic including the propositional and predicate calculi, formal language and automata theory. Exercises are designed to develop basic skills and offer an entry to linguistic applications of mathematical concepts.

Textbook: Barbara H. Partee, Alice ter Meulen, Robert E. Wall. Mathematical Methods in Linguistics.

Course Requirements

Students are expected to complete 4 assignments and 2 take-home examinations.

SIMON FRASER UNIVERSITY DEPARTMENT OF LINGUISTICS

GRADUATE COURSE OUTLINE. SEM. 199X.

*LINGUISTICS 821-4 PHONETICS.

Course Instructor: Prof. E. Wyn Roberts

Time:

Office: CC8304: Telephone (291-)3678

Course Description:

Fundamentals of anatomy-physiology, and of acoustics. The types and significance of instrumental and experimental work in phonetics. Critical overview of alternative phonetic modes of analysis and theories - physiological, aerodynamic. auditory-perceptual, acoustic. The issue of correlation of physiological, aerodynamic. auditory-perceptual, acoustic analyses. The relationship of phonetics to phonology in particular and to linguistics in general. Specific issues: traditional segmentation and classification, related to linear vs. so-called "non-linear" (multiplanar) approaches in phonology. Prosodic features including pitch, tone/intonation, rhythm (stress, accent, timing, syllable, foot, etc.), etc.) Relation of prosodic features to phonology and grammar.

Required Texts:

Catford, J. C. (1977) Fundamental Problems in Phonetics., Edinburgh University Press, Edinburgh.

Daniloff, Raymond, et al. (1980) The Physiology of Speech and Hearing: An Introduction., Prentice-Hall, Inc., Englewood Cliffs, New Jersey.

Ladefoged, P. (1962) **Elements of Acoustics Phonetics**., University of Chicago Press, Chicago.

Course Grading:

Term Paper on a topic to be selected through consultation.

SAMPLE WEEK-BY-WEEK BREAKDOWN.

WEEK 1.

Introduction- "definition" of Phonetics. Various approaches.

WEEK 2.

Phonetics as the study of human physiological behaviour. The establishment of the Phonetic System.

WEEK 3.

Specific Instrumental Phonetics - Acoustic vs. Physiological. The issue of CORRELATION. Impressionistic Phonetics - Ear- and Eye-training. Spectrographic analysis (Lab work.).

WEEK 4.

Spectrographic analysis (Lab work.). Continuation.

WEEK 5.

Continuation.

WEEK 6.

Continuation. Variability in so-called "phonetic systems" /charts. Understanding the reasons. Empiricism in Phonetics - and hence in Linguistics (Phonology). Phoneticians' lethargy - and the Redundancy Myth. Lethe, Myth, and Theory - the Q -roles of Phonetics!

WEEK 7.

The questions of Methodology and Theory, Universalism, Naturalism, etc.. Consonants and Vowels - the various "systems". "articulatory" vs. "auditory"/"acoustic" primacy in Phonetic Classification. CORRELATION again.

WEEK 8.

Continuation.

WEEK 9.

The nature of phonetic-linguistic characterisation. What is the relationship of Phonetics and Linguistics?

WEEK 10.

Continuation. The nature of "data" in Phonetics and Linguistics.

WEEK 11.

Linguistic levels (Phonology, Syntax, etc.) and Phonetics. Pitch and Intonation in particular.

WEEK 12.

Continuation.

WEEK 13.

Epilogue-Prologue.

SIMON FRASER UNIVERSITY W.A.C. BENNETT LIBRARY MEMORANDUM

To: Alison Watt

Secretary, SCAP

From: Sharon Thomas

Library

Subject: Linguistics 820, 821 Date: June 22, 1992

cc:

I agree with the assessments of the Department of Linguistics and believe that these two courses will be reasonably well supported by the present collection. Both subjects (formal linguistics and phonetics) are covered by current approval plans and ongoing needs should be met automatically.

Sharon Thomas
