COURSE DESCRIPTION

The content focus of the course is on the games, sports, gymnastics and dance components of the elementary school curriculum. Through selected activities, students will gain practical competence in teaching physical education and an understanding of the instructional principles involved in assisting children to become physically confident and competent.

CONTENT

Practical sessions in the gymnasium, on the playing field and in park settings will be used to illustrate the kinds of activities that can be done with elementary children and provide a basis for our deliberations on best curriculum and instructional practices. The premise of the course is that 'experience is the best teacher' and that one's constructed, recollected experiences of movement provide the most meaningful guide to organizing and facilitating the movement experiences of children.

ASSIGNMENTS

1. Significant Physical Experience: Recall a movement situation that had a significant effect upon you, whether positive or negative. In no more than three pages, describe the actual situation as vividly as possible and draw out the implications of this situation for teaching children. The significant physical experience may be a recollected one from your childhood or pertain to a more recent one where you were involved in teaching children. Due fourth week of class (20%).
2. Activity Log: Find a means of introducing physical activity into your daily routine, or look for ways of extending a sense of physicality into your other daily pursuits. Present the first and last pages of this activity log, indicating your resolution, your accomplishment and your reflections on the significance of this physical engagement. Due final week of class (20%).
3. Instructional Plan: Develop an eight-lesson teaching unit geared to a particular grade level which incorporates the instructional principles taught in this course. Consider especially a 'ground up' sequence of movement possibilities, an 'integrative span' of curricular lessons, and a coherent thematization of desired movement experiences. Due final day of classes (40%).
4. Peer Teaching: In a group of 4, teach a movement concept that applies to the games, sports, gymnastics and dance components of the elementary curriculum. A lesson plan of the one-hour peer teaching exercise is to be submitted at the time of lesson delivery (10%).
5. Class Participation: Participation in class activities is a vital part of the course and will be assessed (10%).
