EDUCATION 431

An Analysis of Educational Concepts

Spring Semester

Instructor: J.R. Covert

Room: 638 (Bldg.6)  
Phone: 291-3519

The purpose of this course is to help students of education to apply some of the tools of philosophy to specific problems in education. In order to accomplish this purpose, some of the more significant concepts commonly used by educators will be analyzed, including: education, knowing, teaching, indoctrination and equality. Through an understanding of the language of education some of the more significant problems in education will be analyzed in an effort to learn how one goes about generating the best solution to such problems.

The course will be conducted mainly as a seminar centering on specific assigned readings each week. A lecture format will be used to introduce the topics but participation by seminar members will be encouraged. The course will be organized around the following broad topics.

The Language of Education  
The Concept of Education  
Knowing and Understanding  
Teaching and Learning  
Aims of Education and the Curriculum  
Some Normative Issues of Education

REQUIRED TEXTS:

Woods and Barrow: An Introduction to the Philosophy of Education (1975)

RECOMMENDED TEXTS:
