Phone: 291-4853
E-mail: cheryl_amundsen@sfu.ca

Tuesdays 17:30-20:20 in EDB 8500

PREREQUISITES

You will need to have Internet access to complete many of the assignments in this course. Therefore, you must have Internet access at home or be on campus at least 2-3 times during the week. As well, there will be some assignments that will require specific software applications available on computers in the Faculty of Education Centre for Educational Technology (CET). You will, therefore, need to schedule some time to work in the CET outside of class time.

COURSE DESCRIPTION AND LEARNING OUTCOMES

This course is designed to be interactive and hands-on. It will provide an exciting beginning experience for those who desire to integrate technology into classroom teaching. The course is also meant to introduce you to some of the social, cultural and instructional issues surrounding the use of technology in K-12 educational settings through formal and informal discussions. The broad goal of the course is to empower pre-service and in-service teachers to begin to use computer (primarily) technologies from a basis of comfort, interest and meaning. As this is an introductory course, we will not achieve great depth, however it is expected that you will leave this course with the technical confidence to pursue further learning on your own and some concrete ideas about how to integrate technology into your teaching.

REQUIREMENTS

- 3 assignment "bundles" - due at the beginning, middle and end of the course. Each portfolio will contain reading activities, short classroom application activities and a short written reflection on your learning to that point. (25% each for a total of 75%)
 - One requirement included in the first assignment "bundle" is participation in the Media, Interactive and Creative (MIC) conference co-sponsored by the Cable in the Classroom Consortium and SFU to be held on Saturday, May 12 from 9:00-3:00. This conference will replace a regular class session. Your cost for the conference will be \$12.00.
- A position paper - Each individual will select as a paper topic some aspect of one of the issues discussed in class surrounding the use of technology in Education. (25%)

REQUIRED TEXT

Tiene, D., & Ingram, A. (2001). *Exploring Current Issues in Educational Technology*. Toronto: McGraw Hill. ISBN 0-07-230480-4.

OPTIONAL TEXT

(1998). *Read less, learn more: Teach yourself computers and the internet visually*. (2nd Edition) Chicago: Maran Graphics. ISBN 0-7645-6041-7.
