EDUCATION 326-3 CLASSROOM MANAGEMENT AND DISCIPLINE

This course introduces students to the major principles and applications associated with a variety of models of classroom management. Through the use of theoretical summaries, practical illustrations, and critical analyses, students are encouraged to understand and assess these models as they might be employed in classroom and school contexts. No one approach is advocated over the others. Rather, the aim is to help students to comprehend each model and its claims, to evaluate the coherence and appropriateness of the theories and methods advocated, and to develop their own ideas concerning classroom management based on such understanding and assessment.
