DESCRIPTION

This course will focus on developing knowledge, skills and strategies to create a rich and stimulating language arts program in the classroom. The course will offer you the best from both the world of research and the world of the classroom.

Issues in reading, writing, speaking and listening will be examined through current theory and teaching practice. Language acquisition will be viewed as a holistic, integrated process through which children's abilities develop naturally as they make meaning of their world.

You will have opportunities to examine your personal beliefs about children, the teacher and the curriculum; and to explore the congruency between theory and practice. The course will provide you with a framework to examine and reflect on your understandings about learning and teaching the language arts, and your role as teacher in engaging children in communicating and searching for meaning.

The course will comprise a broad range of experiences. These will include professional readings, discussion, written response, seminars, demonstrations, individualized tasks, and small-group work threaded through cooperative learning strategies. Upon completion of this course you should have an extensive repertoire of strategies and materials to use in the classroom.
