

## SENATE SUMMARY MEETING OF JANUARY 9, 2017

### 1. Report of the Chair

The Chair reported that on November 24, 2016 the SFU Board of Governors committed to decreasing the carbon footprint of SFU's investment portfolio by at least 30% by 2030. We join the University of Ottawa as one of only two universities in Canada to put conditions of this kind on our investment policy and set targets to reduce our carbon footprint.

The Chair reported that on November 25, 2016 the federal government approved the Kinder Morgan Pipeline, which includes a proposal to triple the capacity of the tank farm on Burnaby Mountain. Approval was given despite SFU publically raising concerns, including submitting a report to the federal government cataloguing those concerns.

The Chair noted the recent closures of the university due to snow. He thanked the team of people across the university who worked hard to deal with difficult situations and make the best out of a situation that has caused considerable disruption. It was noted that on December 9<sup>th</sup> and 10<sup>th</sup> 57 final examinations needed to be cancelled or rescheduled, which translated to 4600 individual examinations being rescheduled. The majority of these exams were rescheduled for December 19<sup>th</sup> and 20<sup>th</sup>, with a small number switching to take home exams or other arrangements, such as rescheduling the class to write their exam at the start of the next term. As of January 9<sup>th</sup>, approximately 850 deferred grades from 2016 are set to be handled, with the vast majority of these due to rescheduled exams. It is expected that almost all of these arrangements will be concluded by January 14<sup>th</sup>.

The Chair noted that the Fall 2016 President's Dream Colloquium *Returning to the Teachings: Justice, Identity & Belonging* involved some amazing speakers on Indigenous issues and thanked the faculty members and first nation elders that participated in putting the program together. The Chair also noted the appreciation breakfast held in November for the people who volunteered to put together the Spring and Fall convocation ceremonies.

The Chair reported on a number of research innovations and awards:

- Drug research at SFU is going to receive a boost thanks to a \$13 million infusion of provincial funding for the Centre of Drug Research and Development (CDRD). Funding will support impact orientated research and innovation and fits within our SFU Innovates strategy.
- SFU Engineering professor Bernhard Rabus was appointed to a new \$2.25 million NSERC chair in Synthetic Aperture Radar was announced prior to the holiday break. This chair is supported by MDA and the

Canadian Space Agency and will further position SFU as a leader in space based technology.

- Ryan Morin (Molecular Biology and Biochemistry) has been awarded \$757,000 from the Terry Fox Research Institute and Foundation for his “Tumor evolution and the biology of treatment failure in DLBCL” project.
- Corina Andreoiu (Chemistry) has been granted \$500,000 for SFU’s portion of the CFI Innovation Fund grant that was awarded through the Guelph University *GRIFFIN Compton and background suppression shields project*, and is being matched by the BC Knowledge Development Fund.
- Bernd Stelzer (Physics) has been awarded \$425,000 from CFI’s John R. Evan’s Leaders Fund for his “Modern Particle physics detector development infrastructure for Large Hadron Collider era” project. The award has been matched by TRIUMF, Canada’s National Laboratory for Particle Nuclear Physics.
- SFU is in the process of seeking change maker designation as part of the Ashoka Changemaker Campus network. This is one of the world’s leading social entrepreneurship organizations, with 38 universities worldwide having been designated since 2008. A site visit is planned for early 2017.
- Professor John Willinsky of SFU’s Publishing Program, that headed a public knowledge project, received the 2016 Social Sciences and Humanities Research Council (SSHRC) Impact Award. This is a major national award in the connection category and comes with a \$50,000 award recognizing the SSHRC-funded initiative to facilitate the flow and exchange of research knowledge within the academic community.
- Fred Popowich has been appointed to serve as the inaugural Executive Chair of the Big Data Initiative, known as SFU Key. He will be engaging with the community to position SFU as a leader in big data. The official launch of SFU Key is planned for late February.

The Chair noted the Surrey Expansion announcement at the end of 2016, with both the Prime Minister and the Premier on hand to announce \$90 million in federal and provincial funding for a new Energy Systems and Environmental Engineering Building at our Surrey campus. That building will be home to our current Mechatronic Systems Engineering Program, and proposed new programs in energy and environmental engineering.

The Chair noted some upcoming events: the President’s Dream Colloquium starts on January 26<sup>th</sup>, focusing on understanding medical marijuana; The SFU Public Square Community Summit will take place the last week of February, focusing on Canada’s role in the world; a joint Senate-Board of Governors Retreat is being planned for March; and SFU is hosting an international biannual conference on university community engagement called CU2Expo, to be held the first week of May and will be a chance to explore ways in which universities across Canada and around the world are using their strengths to engage and build communities.
