**MEMORANDUM**

---

<b>ATTENTION</b>	Senate	<b>DATE</b>	May 7, 2010
<b>FROM</b>	Rolf Mathewes, Acting Chair Senate Committee on Undergraduate Studies	<b>PAGES</b>	1/2
<b>RE:</b>	Faculty of Science		

---

**For information:**

Acting under delegated authority at its meeting of May 6, 2010, SCUS approved the following curriculum revisions:

1. Department of Mathematics (SCUS 10-24)
  - (i) W-designations for MATH 208W and 402W.
2. Department of Chemistry ( SCUS 10-29a)
  - (i) Changes to course prerequisites (outdated course references)
3. Department of Molecular Biology and Biochemistry (SCUS 10-29b)
  - (i) Change to major program requirements

Senators wishing to consult a more detailed report of curriculum revisions may do so on the Web at [http://www.sfu.ca/senate/Senate\\_agenda.html](http://www.sfu.ca/senate/Senate_agenda.html) following the posting of the agenda. If you are unable to access the information, please call 778-782-3168 or email [bgrant@sfu.ca](mailto:bgrant@sfu.ca).

**For information:**

SCUS 10-24

Faculty of Science  
Dean's Office  
P9309 – Shrum Science Centre  
8888 – University Drive  
Burnaby, BC V5A 1S6

Rolf W. Mathewes, PhD  
Associate Dean of Science

TO: Jo Hinchcliffe, Secretary  
Senate Committee on Undergraduate Studies

March 16, 2010

*effective 2010/2011*

Jo:  
The Faculty of Science has approved the following two W-designations, which were also approved by the University Curriculum Office.

- MATH 208W-3                      INTRODUCTION TO OPERATIONS RESEARCH
- MATH 402W-4                      INDUSTRIAL MATHEMATICS PROJECT

Would you please place these items on the agenda of the April 1, 2010 meeting of SCUS for approval.

SFU

**MEMO**

DEPARTMENT OF MATHEMATICS

---

**ATTENTION** **Dr. Rolf Mathewes**  
Dept./Company Faculty of Science Undergraduate Curriculum  
Committee  
Local 24472

**From:** **Dr. Tom Archibald**  
Mathematics Chair, Local 23378  
**cc. Dr. David Muraki**, Mathematics Undergrad Studies Committee Chair  
**cc. Dale Yamaura**, Mathematics Advisor

**RE:** QBW designations: MATH 402 and 208

**Date:** March 16, 2010

The University Curriculum Office approved the following WQB designations:

W / Q	MATH 208	Introduction to Operations Research
W / Q	MATH 402	Industrial Mathematics Project

Could you please place these items on the agenda of the next meeting of SCUS (April 1, 2010).

Find the attached documentation.

Sincerely,

Tom Archibald

### **CHEM 236W-3 Inorganic Chemistry Laboratory**

An introduction to the synthetic and spectroscopic techniques used in the preparation and characterization of both main group and transition metal compounds. Prerequisite: CHEM 122 and 126 (~~or 103 and 118~~). Corequisite: CHEM 230. Writing/Quantitative.

### **CHEM 260-4 Atoms, Molecules, Spectroscopy**

Elements of physical chemistry from the molecular point of view. Introduction to quantum chemistry, atomic and molecular structure, and spectroscopy. Prerequisite: CHEM 122 (~~or 103~~), MATH 152, PHYS 121. Recommended: MATH 232. Quantitative.

### **CHEM 281-4 Organic Chemistry I**

Structure, bonding, physical and chemical properties of simple organic compounds. Introduction to spectroscopy. Kinetics and mechanisms of organic reactions. This course includes a laboratory component. Prerequisite: CHEM 121. Corequisite: CHEM 122 (~~or 103~~). Quantitative.

### **CHEM 316-4 Introductory Instrumental Analysis**

Principles and applications of basic analytical instrumentation based upon spectroscopy, chromatography and electrochemistry. Prerequisite: CHEM 215 (~~or 218~~) and CHEM 260, or permission of the department. Students may not count both CHEM 316 and 416 for credit. Quantitative.

### **CHEM 333-3 Inorganic Chemistry of Biological Processes**

An introduction to the principles governing the formation, properties and investigation of metal-ligand complexes with special reference to the role of metals in biological processes. Prerequisite: MBB 321 (~~or BICH 301 or 321~~); or CHEM 282 (~~or 250~~) and CHEM 230 (~~or 232~~). Quantitative.

### **CHEM 360-3 Thermodynamics and Chemical Kinetics**

Elements of physical chemistry from the macroscopic point of view. Thermodynamics, and its applications to chemical equilibrium. Chemical kinetics and reaction rate theories. Prerequisite: CHEM 122 (~~or 103~~), MATH 152 (or 155), PHYS 121 (or 102). Recommended: MATH 251. Quantitative.

### **CHEM 371-3 Chemistry of the Aqueous Environment**

An introduction to chemical processes in the aqueous environment. Quantitative treatment of the variables determining the composition of natural systems. Chemistry of aqueous toxic agents, wastewater treatment, and related matters. Prerequisite: CHEM 281 (~~or 150~~) and CHEM 360 (~~or 261~~). Quantitative.

### **CHEM 372-3 Chemistry of the Atmospheric Environment**

Quantitative treatment of chemical and physical processes in the atmospheric environment. Chemistry of the troposphere including air pollution and climate change. Chemistry of the stratosphere including ozone depletion. Environmental radioactivity. Current topics. Prerequisite: CHEM 281 (~~or 150~~) and CHEM 360 (~~or 261~~). Quantitative.

### **CHEM 380-4 Chemical and Instrumental Methods of Identification of Organic Compounds**

Basic principles of infrared, ultraviolet, nuclear magnetic resonance and mass spectroscopy as applied to the identification of organic compounds. Prerequisite: CHEM 260 and 282 and 286 (~~or 250 and 255~~), or permission of the department.

### **CHEM 450-3 Physical Organic Chemistry**

A study of the structure, stereochemistry and conformation of molecules and their effect on the reactivity of organic molecules. The physical basis of organic chemistry. Prerequisite: CHEM 360 (~~or 261~~) and 380. Quantitative.

### **CHEM 460-3 Advanced Physical Chemistry**

Statistical thermodynamics, kinetic theory of gases, transport properties, intermolecular forces, electrical properties of molecules, properties of ionic solutions, Debye-Hückel theory, electrochemistry. Prerequisite: MATH 251; CHEM 260 and 360, or PHYS 385 and 344 (~~or 244~~). Quantitative.

### **CHEM 469-3 Special Topics in Physical Chemistry**

Selected topics of physical chemistry not regularly covered in the chemistry undergraduate course offerings. Topics may vary from year to year and may include (but are not limited to): chemical kinetics, electrochemistry, magnetic resonance, polymer chemistry, surface chemistry. Prerequisite: CHEM 260 and 360 (~~or 261 and 361~~) or permission of the instructor.

**SIMON FRASER UNIVERSITY**  
**Program Change Form**

**Program:** Major in Molecular Biology and Biochemistry

**From:**

Upper Division Core Requirements  
(22 units)

Students complete all of

MBB 308-3 Molecular Biology Laboratory  
MBB 309W-4 Biochemistry Laboratory  
MBB 321-3 Intermediary Metabolism  
MBB 322-3 Molecular Physiology  
MBB 331-3 Molecular Biology

and one of

*CHEM 360-3 Chemical Kinetics and Thermodynamics*  
*MBB 323-3 Introduction to Physical Biochemistry*

and one of

MATH 310-3 Introduction to Ordinary Differential Equations  
STAT 201-3 Statistics for the Life Sciences  
STAT 270-3 Introduction to Probability and Statistics

Students complete a minimum of five courses from the list below. There is no upper limit on the quantity in this list that can be completed.

MBB 402-3 Molecular Genetics  
MBB 420-3 Special Topics in Biochemistry  
MBB 421-3 Nucleic Acids  
MBB 422-3 Biomembranes  
MBB 423-3 Protein Structure and Function  
MBB 424-3 Membrane Transport Mechanisms  
*MBB 426-3 Immune System I*  
MBB 427-3 Immune System II  
MBB 428-3 Molecular Mechanisms of Molecular Pathogenesis  
MBB 430-3 Mechanisms of Secretory Transport  
MBB 431-3 Cells and Disease  
MBB 432-3 Advanced Molecular Biology Laboratory  
MBB 435-3 Genome Biology  
MBB 436-3 Gene Expression  
MBB 437-3 Selected Topics in Signal Transduction  
MBB 438-3 Human Molecular Genetics  
MBB 440-3 Special Topics in Molecular Biology  
MBB 441-3 Bioinformatics  
MBB 442-3 Proteomics  
MBB 443-3 Protein Biogenesis and Degradation  
MBB 444-3 Developmental Neurobiology  
PHYS 433-3 Biological Physics Lab

**To:**  
Upper Division Core Requirements

**(19 units)**

Students complete all of

MBB 308-3 Molecular Biology Laboratory

MBB 443-3 Protein Biogenesis and Degradation  
MBB 444-3 Developmental Neurobiology  
PHYS 433-3 Biological Physics Lab

**Rationale:**

It is essential that all MBB majors are exposed to the core content of MBB323-3 Physical Biochemistry, as part of their MBB program, but it is not essential that all MBB majors be required to study the more advanced aspects of MBB323. The MBB department has identified the core content of MBB323 and has determined that this core content can be included in existing required MBB courses without significantly impacting the content of these existing courses. MBB 323 will remain an important part of our undergraduate program, but as an elective rather than a required course and the content of MBB323 will be adjusted to reflect an emphasis on the more advanced aspects of Physical Biochemistry.

Effective date: Fall, 2010 (1107)

(1) Long title for calendar and schedule, no more than 100 characters including spaces and punctuation.

Immune System I: Basis on Innate and Adaptive Immunity

Immune System I: Basis on Innate and Adaptive Immunity

(2) Short title for enrollment and transcript, no more than 30 characters including spaces and punctuation.

Immune System I

Immune System I

The basic organization of the immune system, including structure, function and genetics of antibodies, T-cell receptors, innate immune receptors, and the complement system. Innate, antibody and cellular immune responses and their control, and development of the cells involved in these responses.

The basic organization of the immune system, including structure, function and genetics of antibodies, T-cell receptors, innate immune receptors, and the complement system. Innate, antibody and cellular immune responses and their control, and development of the cells involved in these responses.

**PREREQUISITE**

MBB 331. Students who have taken HSCI 325 or 426 cannot take MBB 426 for further credit

**PREREQUISITE :**

MBB 331. Students who have taken HSCI 325 or 426 cannot take MBB 426 for further credit

Does this course replicate the content of a previously approved course to such an extent that students should not receive credit for both courses? If so, this should be **noted in the prerequisite.**

**Rationale: The workload for students in this course is already reflective of a 4 unit rather than a 3 unit course and it is not possible to reduce the amount of material in this course without compromising the integrity of the course. Adding the extra unit hour will not only ensure that students receive the credit that is appropriate for the workload and amount of material, but also ensure that students are aware coming into the course that the workload is more than that of a 3 unit, 400 level MBB course. Adding the extra hour of lecture per week will insure that students will be able to have all the material presented to them in the most effective way.**
