MEMORANDUM

ATTENTION Senate
 FROM Wade Parkhouse, Chair
 Senate Committee on
 Undergraduate Studies
 RE: New Course Proposals

DATE May 3, 2019

PAGES 1/1

For information:

Acting under delegated authority at its meeting of May 2, 2019 SCUS approved the following curriculum revisions effective Spring 2020.

a. Faculty of Applied Sciences (SCUS 19-34)1. The School of Engineering Science

(i) New Course Proposals: ENSC 413-4, Deep Learning Systems in Engineering

b. Faculty of Science (SCUS 19-35)1. Department of Biology

(i) New Course Proposals:

- MASC 414-3/6, Coastal Biodiversity and Conservation
- MASC 416-3/6, Coastal Community Ecology
- MASC 417-3, Crustacean Biology
- MASC 418-3/6, Behavioural Ecology of Marine Organisms
- MASC 419-3, Subtidal Science
- MASC 420-3/6, Marine Phycology
- MASC 421-3/6, Freshwater and Terrestrial Conservation
- MASC 435-3/6, Biological Oceanography
- MASC 436-3, Applied Data Analysis in Marine Science

Senators wishing to consult a more detailed report of curriculum revisions may do so on the Senate Docushare repository at

<https://docushare.sfu.ca/dsweb/View/Collection-12682>.

COURSE SUBJECT ENSC NUMBER 413

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation
Deep Learning Systems in Engineering

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation
Deep Learning Systems

CAMPUS where course will be normally taught: [X] Burnaby [] Surrey [] Vancouver [] Great Northern Way [] Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.
Machine learning basics, generalization theory, training, validation, and testing. Introduction to artificial neural networks: feedforward, convolutional, recurrent networks. Types of layers in deep models. Architectural and memory calculations. Regularization and optimization. Hardware architectures for deep learning. The course culminates in a major project focusing on engineering applications of deep learning.

REPEAT FOR CREDIT [] YES [X] NO Total completions allowed 1 Within a term? [] YES [] NO

LIBRARY RESOURCES
NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit www.lib.sfu.ca/about/overview/collections/course-assessments.

RATIONALE FOR INTRODUCTION OF THIS COURSE
Many engineering systems are nowadays being designed and built around deep learning models. It is important for engineering students to understand the basics of deep learning, be able to implement and test deep learning models, and understand the challenges around their training and deployment. This course teaches deep learning "as a tool" to be used in various engineering systems.

SCHEDULING AND ENROLLMENT INFORMATION

Effective term and year (e.g. FALL 2016) Spring 2020

Term in which course will typically be offered [X] Spring [] Summer [] Fall

Other (describe)

Will this be a required or elective course in the curriculum? [] Required [X] Elective

What is the probable enrollment when offered? Estimate: 30

UNITS Indicate number of units: 4

OTHER

FACULTY Which of your present CFL faculty have the expertise to offer this course? Ivan Bajic, Jie Liang

WQB DESIGNATION (attach approval from Curriculum Office)

PREREQUISITE AND / OR COREQUISITE MATH 251, ENSC 280, ENSC 351, ENSC 380.

EQUIVALENT COURSES [For more information on equivalency, see Equivalency Statements under [Information about Specific Course components.](#)]

1. SEQUENTIAL COURSE [is not hard coded in the student information management system (SIMS).]

Students who have taken *(place relevant course(s) in the blank below (ex: STAT 100))* **first** may not then take this course for further credit.

2. ONE-WAY EQUIVALENCY [is not hard coded in SIMS.]

(Place relevant course(s) in the blank below (ex: STAT 100)) will be accepted in lieu of this course.

3. TWO-WAY EQUIVALENCY [is hard coded and enforced by SIMS.]

Students with credit for *(place relevant course(s) in the blank below (ex: STAT 100))* may not take this course for further credit.

ENSC 813

Does the partner academic unit agree that this is a two-way equivalency? YES NO

Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).

4. SPECIAL TOPICS PRECLUSION STATEMENT [is not hard coded in SIMS.]

N/A

FEES

Are there any proposed student fees associated with this course other than tuition fees? YES NO

COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)

After completing this course, the students should:

- Understand key ideas behind deep learning
- Understand the terminology and be able to follow the literature in the field
- Be able to formulate a machine learning problem, implement and test a deep learning model for the problem in the relevant software

RESOURCES

List any outstanding resource issues to be addressed prior to implementation: space, laboratory equipment, etc:

N/A

OTHER IMPLICATIONS

Final exam required YES NO

Criminal Record Check required YES NO

OVERLAP CHECK

Checking for overlap is the responsibility of the Associate Dean.

Each new course proposal must have confirmation of an overlap check completed prior to submission to the Faculty Curriculum Committee.

Name of Originator

Ivan Bajic

COURSE SUBJECT MASC NUMBER 414

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation Coastal Biodiversity and Conservation

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation Coastal Biodiv. & Conservation

CAMPUS where course will be normally taught: Burnaby Surrey Vancouver Great Northern Way Off campus

COURSE DESCRIPTION — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box. Current topics, concepts, and practice in coastal conservation biology, with a focus on biodiversity within marine, intertidal, and terrestrial ecosystems.

REPEAT FOR CREDIT YES NO Total completions allowed Within a term? YES NO

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit www.lib.sfu.ca/about/overview/collections/course-assessments.

RATIONALE FOR INTRODUCTION OF THIS COURSE

MASC (Marine Science) courses are offered through Bamfield Marine Science Centre, of which SFU is a partner. Students from partner institutions take courses at Bamfield but receive credit through their home institutions. This course has been offered at Bamfield for several years, but previously students got credit as an MASC Special Topics course. This course is offered regularly, and Bamfield recommends assigning a permanent course number. Notes. Projected enrollment appears low because it reflects only the students in the course whose home institution is SFU. Bamfield Marine Science Centre runs summer courses in 3 or 6 week blocks. They would like the flexibility to offer these courses in either block. If the course duration is 6 weeks, the students will receive 6 units; if the course duration is 3 weeks, the students will receive 3 units. This has been proposed following consultation with Susan Rhodes, the Director of University Curriculum and Institutional Liaison.

EQUIVALENT COURSES [For more information on equivalency, see Equivalency Statements under [Information about Specific Course components.](#)]

1. SEQUENTIAL COURSE [is not hard coded in the student information management system (SIMS).]

Students who have taken *(place relevant course(s) in the blank below (ex: STAT 100))* **first** may not then take this course for further credit.

2. ONE-WAY EQUIVALENCY [is not hard coded in SIMS.]

(Place relevant course(s) in the blank below (ex: STAT 100)) will be accepted in lieu of this course.

3. TWO-WAY EQUIVALENCY [is hard coded and enforced by SIMS.]

Students with credit for *(place relevant course(s) in the blank below (ex: STAT 100))* may not take this course for further credit.

Does the partner academic unit agree that this is a two-way equivalency? YES NO

Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).

4. SPECIAL TOPICS PRECLUSION STATEMENT [is not hard coded in SIMS.]

Students who have taken Special Topics course MASC 473 Terrestrial and Freshwater Conservation may not take MASC 421 for further credit.

FEES

Are there any proposed student fees associated with this course other than tuition fees? YES NO

COURSE - LEVEL EDUCATIONAL GOALS (OPTIONAL)

RESOURCES

List any outstanding resource issues to be addressed prior to implementation: space, laboratory equipment, etc:

None by SFU. All resources are provided by Bamfield Marine Sciences Centre.

OTHER IMPLICATIONS

Final exam required YES NO

Criminal Record Check required YES NO

OVERLAP CHECK

Checking for overlap is the responsibility of the Associate Dean.

Each new course proposal must have confirmation of an overlap check completed prior to submission to the Faculty Curriculum Committee.

Name of Originator

Kathleen Fitzpatrick

COURSE SUBJECT

MASC

NUMBER

435

COURSE TITLE LONG — for Calendar/schedule, no more than 100 characters including spaces and punctuation

Biological Oceanography

COURSE TITLE SHORT — for enrollment/transcript, no more than 30 characters including spaces and punctuation

Biological Oceanography

CAMPUS where course will be normally taught: Burnaby Surrey Vancouver Great Northern Way Off campus**COURSE DESCRIPTION** — 50 words max. Attach a course outline. Don't include WQB or prerequisites info in this description box.

Introduction to the organisms of the open sea and coastal zone, their adaptations to the environment, and the factors that control their productivity, distribution and abundance.

REPEAT FOR CREDIT

YES

NO

Total completions allowed

Within a term?

YES

NO

LIBRARY RESOURCES

NOTE: Senate has approved (S.93-11) that no new course should be approved by Senate until funding has been committed for necessary library materials. Each new course proposal must be accompanied by the email that serves as proof of assessment. For more information, please visit www.lib.sfu.ca/about/overview/collections/course-assessments.

RATIONALE FOR INTRODUCTION OF THIS COURSE

MASC (Marine Science) courses are offered through Bamfield Marine Science Centre, of which SFU is a partner. Students from partner institutions take courses at Bamfield but receive credit through their home institutions. This course has been offered at Bamfield for several years, but previously students got credit as an MASC Special Topics course. This course is offered regularly, and Bamfield recommends assigning a permanent course number.

Notes.

Projected enrollment appears low because it reflects only the students in the course whose home institution is SFU.

Bamfield Marine Science Centre runs summer courses in 3 or 6 week blocks. They would like the flexibility to offer these courses in either block. If the course duration is 6 weeks, the students will receive 6 units; if the course duration is 3 weeks, the students will receive 3 units. This has been proposed following consultation with Susan Rhodes, the Director of University Curriculum and Institutional Liaison.

SCHEDULING AND ENROLLMENT INFORMATION

Effective term and year (e.g. FALL 2016) Spring 2020

Term in which course will typically be offered [] Spring [x] Summer [] Fall

Other (describe) []

Will this be a required or elective course in the curriculum? [] Required [x] Elective

What is the probable enrollment when offered? Estimate: 5

UNITS Indicate number of units: 3 or 6

Indicate no. of contact hours: [] Lecture [] Seminar [] Tutorial [] Lab [x] Other; explain below

OTHER

Combination of lectures, labs, field trips and independent research.

FACULTY

Which of your present CFL faculty have the expertise to offer this course?

Courses are taught by rotating Faculty members at Bamfield.

WQB DESIGNATION

(attach approval from Curriculum Office)

[]

PREREQUISITE AND / OR COREQUISITE

Pre-requisites are set by Bamfield Marine Science Centre, and normally include completion of lower division core courses.

EQUIVALENT COURSES [For more information on equivalency, see Equivalency Statements under [Information about Specific Course components.](#)]

1. SEQUENTIAL COURSE [is not hard coded in the student information management system (SIMS).]

Students who have taken *(place relevant course(s) in the blank below (ex: STAT 100))* **first** may not then take this course for further credit.

2. ONE-WAY EQUIVALENCY [is not hard coded in SIMS.]

(Place relevant course(s) in the blank below (ex: STAT 100)) will be accepted in lieu of this course.

3. TWO-WAY EQUIVALENCY [is hard coded and enforced by SIMS.]

Students with credit for *(place relevant course(s) in the blank below (ex: STAT 100))* may not take this course for further credit.

REM 370 - Global Issues in Oceanography

Does the partner academic unit agree that this is a two-way equivalency? YES NO

Please also have the partner academic unit submit a course change form to update the course equivalency for their course(s).

4. SPECIAL TOPICS PRECLUSION STATEMENT [is not hard coded in SIMS.]

Students who have taken Special Topics course MASC 477 Biological Oceanography may not take MASC 435 for further credit.
