SPECIAL ARRANGEMENTS FOR GRADUATE STUDENTS

ACCEPTED INTO THE FACULTY OF EDUCATION BEFORE REORGANIZATION

The reorganization of the Faculty of Education, effective January 1, 1972, has caused complications for graduate students currently enrolled at S.F.U. and originally enrolled in the Faculty of Education. The Executive Committee of the Senate Graduate Studies Committee has decided to deal with this situation as follows:

- a) Those graduate students previously accepted into the P.D.C. section of the Faculty of Education whose programs are unaffected by the change will remain in the Faculty of Education. As the reorganized Faculty of Education has no departments, the Faculty Graduate Studies Committee will act with the powers, responsibilities and privileges of a Departmental Graduate Studies Committee with respect to these students.
- b) Those graduate students previously accepted into Communication Studies or Behavioural Science Foundations will continue to have their programs overseen in accordance with the Regulations by the Graduate Studies Committee of those units. The Executive Committee of the Senate Graduate Studies Committee will act with the powers and responsibilities of a Faculty Graduate Studies Committee with respect to these students.
- c) Those graduate students previously accepted into the Faculty of Education who do not fall into the categories above will be encouraged to seek a solution to the problem of their status by transferring into existing

programs in the University under normal procedures for such transfers. The Dean of Graduate Studies will do what he can to facilitate such transfers on an individual basis. However, this provision will not take care of all cases.

- d) Those graduate students previously accepted into the Faculty of Education who cannot be accommodated in the ways outlined above should apply to the Dean of Graduate Studies so that special arrangements can be made for them on an individual basis. The Dean will refer all such cases to the Executive Committee of the Senate Graduate Studies Committee which will act with the powers and responsibilities of a Departmental Graduate Studies Committee and of a Faculty Graduate Studies Committee with respect to these students. The Committee will act on the following two principles:
- i) Academic standards must be maintained
 - ii) The interests of students in-program must, as far as is practicable, be protected.
