Kinesiology

To: Members of Senate

From: K. E. Rieckhoff, Chairman
Senate Committee on Kinesiology

Date: March 20, 1967

Re. REPORT OF SENATE COMMITTEE ON KINESIOLOGY

In its meeting on March 7th, 1967, the Senate Committee on Kinesiology met with all members present except the representative from the Faculty of Arts. The committee discussed its terms of reference. It was of the opinion that the motion in Senate by which it was constituted was sufficiently vague to allow a variety of interpretations regarding the actual role of the committee. The committee decided to interpret its duties as set out in the following 4 points, and has instructed the Chairman to present this interpretation to Senate for ratification.

1. (a) The Committee's recommendations on curriculum shall be submitted to Senate. Departments and/or Faculties need not concur.
- (b) Recommendations to Senate that specific courses of the Kinesiology program be offered by certain Departments should be made after consultation with the Departments concerned.
2. Any budgetary recommendations required to implement the curriculum, facilities and/or staff recommendations of the Committee shall be submitted to Senate.
3. Hiring of staff to handle this program is the responsibility of the Departments concerned. If Departments experience conflicts of interests as a result of specific appointments, they are to bring the matter before this Committee for resolution of such conflicts.
4. This Committee has the responsibility of recommending to Senate the degree requirements for the Kinesiology program.

If Senate feels unable to ratify this interpretation under which the committee is now operating, the Chairman was asked to request more specific instructions and directions from Senate.
