DESCRIPTION

This course will introduce the student to contemporary approaches to classroom management and discipline as well as school-wide discipline initiatives. Using lectures, discussion, and small group activities the many issues and skills involved in effective management and discipline will be examined. Students will be encouraged to look at and clarify their own values and goals concerning classroom management and to focus on how they plan to create positive and productive learning environments.

EVALUATION

Final Grades will be based on a variety of sources that may include some or all of the following:

- Attendance and participation
- Critique of weekly readings
- Midterm Exam or Final Exam
- Small group in-class presentation
- Teacher/Administrator interview
- Term Paper
