ARC 372-5

Change in Description

From: "Analysis and interpretation of archaeological data. This lecture and laboratory course combines the practical problems of recognition and interpretation of archaeological specimens, site mapping, typology, seriation, and statistical procedures with the basic principles of archaeological theory."

To: "Analysis and interpretation of archaeological data. This lecture and laboratory course combines the practical problems of recognition and interpretation of archaeological specimens, typology, seriation, and statistical procedures with the basic principles of archaeological theory."

Rationale:

The department found that it was impractical to provide practical problems of site mapping in a laboratory.
