S.78-144

MEMORANDUM

To.....Senate.....	From N.R. Reilly, Chairman Senate Committee on Undergraduate Studies
Subject Program Description and Prerequisite Changes in Kinesiology.	Date 14 November 1978

(A) Action taken by the Senate Committee on Undergraduate Studies at its meeting on October 24, 1978 gives rise to the following motion:

MOTION

That Senate approve and recommend approval to the Board of Governors the addition, as specified in S78-144, of *BICH* 440 to the list of upper division options available to students to fulfill requirements in Kinesiology, as part of the nine hours described on page 330 of the 1978-79 calendar.

(B) Acting in accordance with the powers delegated to the Senate Committee on Undergraduate Studies by Senate (S78-10), the Senate Committee on Undergraduate Studies approved, at its meeting on October 24, 1978, changes in description and prerequisite for Kinesiology courses as outlined below and detailed in S78-144. In accordance with S78-10 this information is being provided to Senate for information only.

- a) Change in Description - KIN. 303-3 - Kinanthropometry
- b) Change in Prerequisite - KIN. 326-3 - Functional Anatomy.

## MEMORANDUM

SEP 28 1978

o..... Dr. T.W. Calvert  
..... Dean, F.I.D.S.  
Subject..... Course changes for Kinesiology  
..... Calendar 1979

From..... John Dickinson  
..... Kinesiology  
Date..... 26 September 1978

The following changes are requested by the departmental curriculum committee and we ask that these items be placed on the agenda of the next undergraduate curriculum committee meeting of FIDS.

1. Addition of BICH 440 to the list of upper division options available to students to fulfill requirements in Kinesiology, as part of the nine hours described on page 330.  
Rationale: This will enable students to pursue aspects of Biochemistry associated with human movement studies.
2. Kinanthropometry (KIN. 303-3)  
Change in calendar description from:  
A study of change in bodily form and function associated with chronological use and physiological maturity in relation to genetic and environmental influences.  
To: A study of human size, shape, proportion, composition, maturation and gross function related to basic concepts of growth, exercise, performance and nutrition.
3. Change in prerequisite for KIN. 326-3 Functional Anatomy from:  
BISC 316  
To: KIN. 100 and at least 30 hours undergraduate course credit.  
Rationale: Bioscience 316 has been a "hidden" prerequisite of the Kinesiology program to date. Bioscience has now made BISC 204 prerequisite for BISC 316 making an additional requirement for KIN. majors.
