Undergraduate Programs

Education 429

July 19, 1979

This is in response to Mr. Nagel's memo of July 13, 1979 regarding the deletion of courses not offered for the past two semesters.

My request dated October 13, 1978 to have Education 429 remain on the books for an additional two semesters was based on the premise that the Undergraduate Programs Committee would have completed a review of courses by this time. However, as you will recall, the UPC course review was delayed last semester (1979-1) pending a more general review of the direction to be taken by our Faculty. It would seem that we should again request Senate to retain Education 429 until such time as the Faculty Review and subsequently the UPC review have run their course. I would note that out of 46 offerings listed in our calendar, this is the only course identified in Mr. Nagel's memo.
